Cloud Readiness Assessment

SCC Hyperscale's Cloud Readiness Assessment is a process to evaluate your organisations current IT infrastructure, applications, people and processes to determine their suitability for migration to cloud services and a cloud operating model.

Key Benefits

- Identify challenges or constraints that could impact your Cloud migration planning

- Clearly identify organisation priorities ensuring your Cloud migration project is appropriately aligned

- Identify areas where current process or IT infrastructure can be improved to drive organisation efficiencies

- Working with your organisation to understand governance requirements, ensuring the appropriate governance and compliance regime is in place in the Cloud

- By identifying potential roadblocks and constraints early on, a Cloud Readiness Assessment can help an organisation avoid costly mistakes and delays during the migration process
