Cognizant Neuro™

Business Process Transformation with Microsoft Power Platform

Duration: 4 - Week Assessment

Today's businesses need to be agile to their customer needs, adapt & automate processes and leverage data to enable decision making. These digital goals are often challenged by cost & time investments. Microsoft Power Platform can supercharge your digital agenda.

Microsoft Power Platform empowers your teams to work together to address challenges effectively by analyzing data, collaborating to build solutions, automating processes, and creating virtual agents to improve customer & user experience.

Cognizant is a leading provider of technology led process transformation and people change enablement. With rich experience in Power Platform delivery and lifecycle accelerators and frameworks, we help modern enterprises scale faster, achieve more and transform the way your teams work.

Siloed technology, operations and business delivery impedes **Speed** of change

Manual data processing prevalent as teams are not **Empowered** with right tools

Our Approach

We help you identify process improvement opportunities and assess your technology readiness to design an implementation blueprint & a qualified pipeline.

Key considerations for Power Platform implementations

- On-demand Change
- Faster Time-to-Market
- Simplified Integration
- Immersive UX Development
- Pre-built Connectors

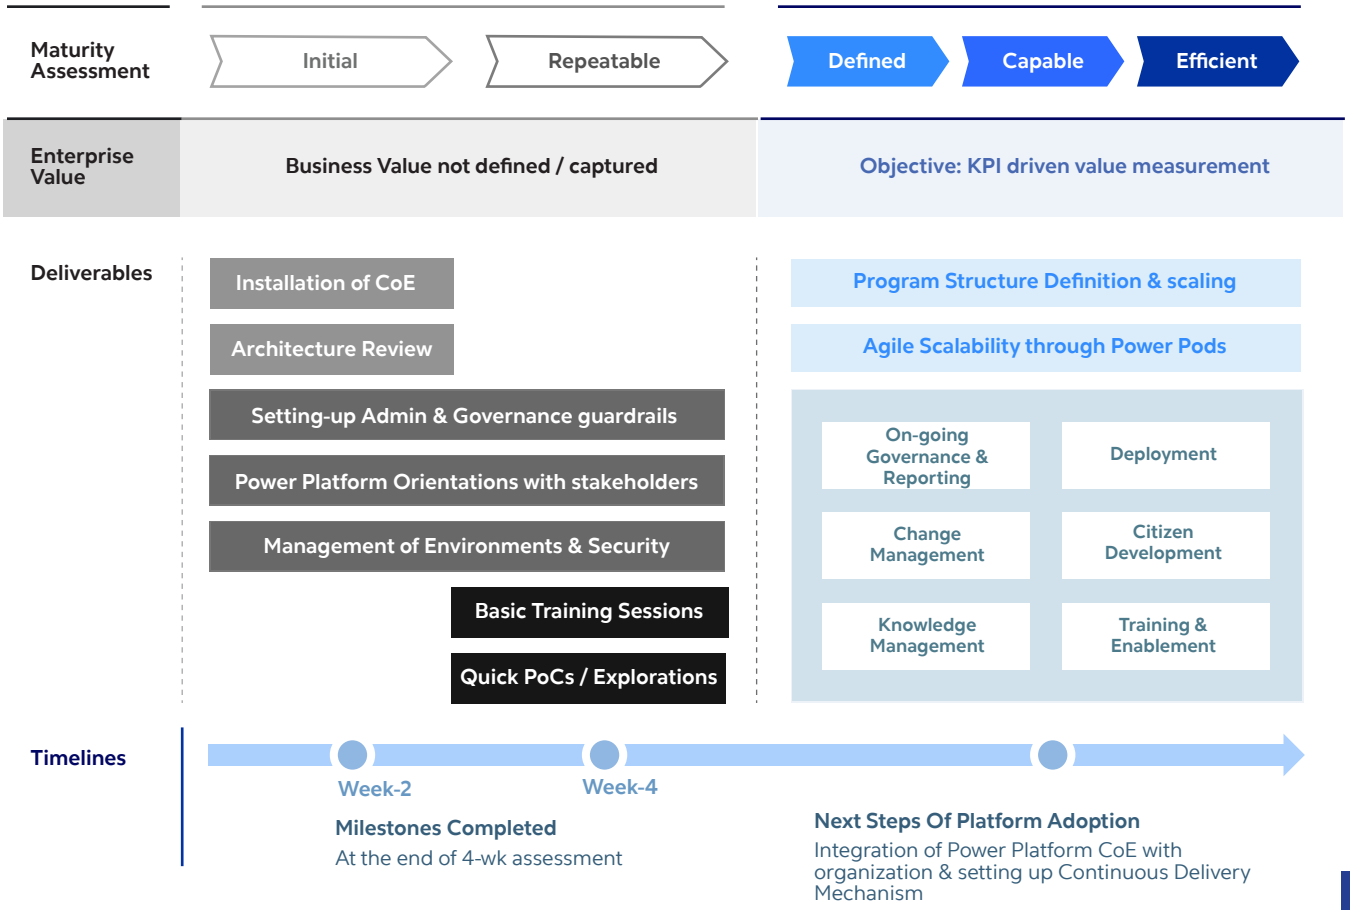
Maturity Assessment aligned with **Microsoft Methodology**

- Legacy Transformation
- Process Transformation
- Experience Transformation

Building a Power Platform CoE

We can help you shorten your learning curve and assure target outcomes. Cognizant has rich experience in setting up Power Platform Center of Excellence to deliver change initiatives, using tools, components & re-usable assets derived from the CoE Starter Kit.

Our methodology leverages Power Platform adoption maturity model to ensure that the adoption & roadmap is aligned to your transformation priorities & goals.



Success Stories

Automation COE partner of choice for a multinational Energy & Utilities company

Trained **900+** employees on Microsoft Power & Automation fundamentals resulting in **$17M** cost and **138K+** hours time savings

Automation Partner for a leading European Automobile company

Enabled real-time SLA tracking and improved efficiency by **5% to 7%** through a user-friendly reporting and finance dashboard

Unlock the Power of collaborative innovation for your teams today
