

APP MIGRATION ASSESSMENT WITH ATROPOSS

ABOUT PRODYNA:

PRODYNA as a system integrator and developer of enterprise business applications works together with Microsoft to accelerate digitalization and promote business innovation in the public cloud. PRODYNA brings 20 years of experience with Java, Linux, and open-source frameworks into the Microsoft customer and partner ecosystem to unify innovative and massively scalable cloud infrastructure with the finest of software architecture paradigms.

Pack years of experience into 3-days

You can spend years experimenting with the best way to migrate on-prem applications to Azure. We've been helping Global 500 enterprises with their Azure migration strategies for years and packed our lessons learned into a package that your company can leverage in just a few days.

– PRODYNA

WHAT WE OFFER

There are many reasons to move apps to the cloud and even more ways to get there. But where do I start? How much will it cost? Which of my applications benefit the most? Which managed Azure services can I use to simplify and optimize my application landscape? This offering will provide you with the expert knowledge to guide you through all your questions and develop a tailor-made roadmap to move your app to the Azure Cloud. Please see the flyer for a description of the methods and deliverables.

This assessment is supported by the Atroposs software. Atroposs is an open-source tool developed by a group of Microsoft partners including PRODYNA that assists in estimating the work required to migrate on-prem applications, databases, and data to Azure. Atroposs runs purely inside a web browser to analyze on-premises database servers, and installed applications without uploading any data to any location outside of your organization. As such, Atroposs does not need to be installed anywhere on hardware within your organization, and there is no need for data privacy concerns.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
