

Modern Endpoint Management Pilot with Microsoft Intune

ABOUT US

CompuNet is a leading U.S. information technology partner specializing in strategic consulting, architecture, solution design, and implementation services specifically tailored to solve business problems. With a best-in-class engineering team and approach, CompuNet focuses on building lasting relationships that prioritize customer satisfaction over sales through every step of the journey.

FEATURES & BENEFITS

- Migrate to cloud-based authentication, configuration, and software management for endpoints.
- Accelerate system deployment and enhance user experience through zero-touch provisioning.
- Improve security by reducing reliance on legacy protocols and improving time to resolution on endpoint vulnerabilities.

Keep up with rapidly evolving endpoint security requirements while providing an enhanced experience for hybrid workers

EDUCATE YOUR TEAM

At the beginning of the engagement, CompuNet Engineers provide education to address skill gaps, ensuring that your team members understand Microsoft Intune's core capabilities and configuration options.

START FRESH WITH NO RISK

Team members can utilize the green field pilot to acquire knowledge and adjust to new technology before gradually implementing Microsoft Intune within your environment.

SECURE BY DEFAULT

The endpoint pilot will begin in a secure and fortified state by leveraging a combination of CompuNet and Microsoft's best practices.

Modern Endpoint Management Pilot with Microsoft Intune

Microsoft Intune can help organizations keep up with rapidly evolving security requirements while providing an enhanced experience for hybrid workers. In this engagement, CompuNet will provide education on Microsoft's modern endpoint strategy and help deploy a pilot focused on best practices from our engineering team. Armed with knowledge and a reference architecture, your team will be well on their way to tackling your unique endpoint challenges.
