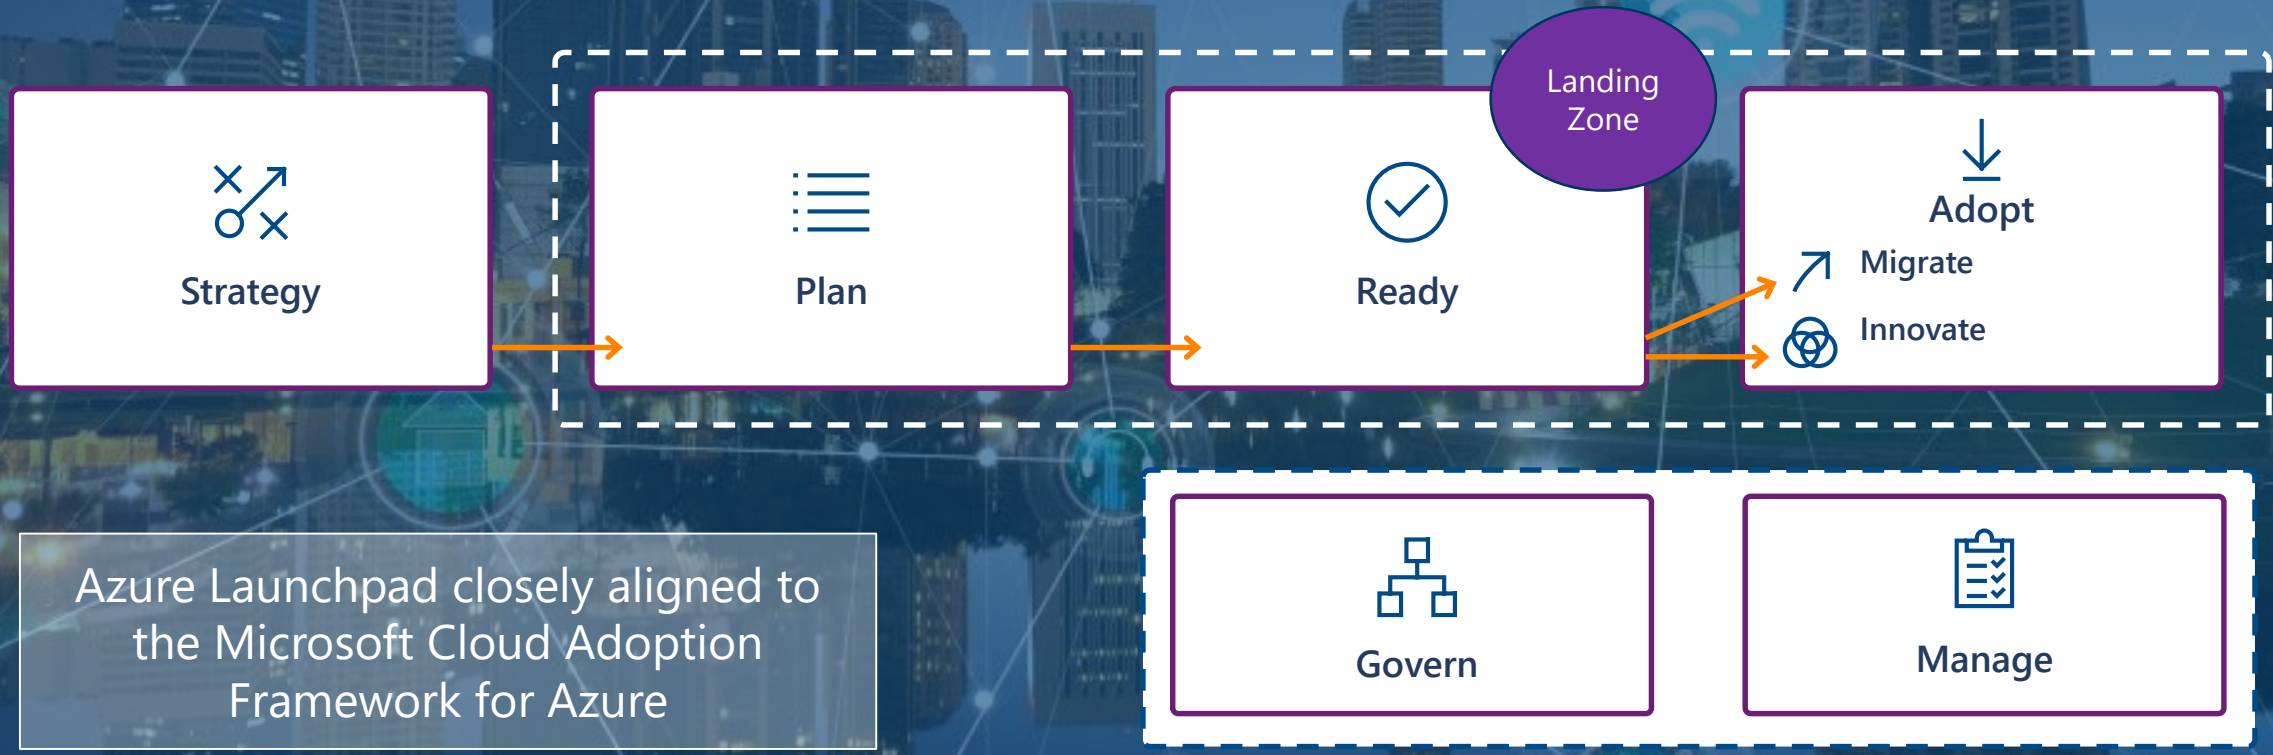
# Azure Launchpad Landing Zone

NEWSIGNATURE

# Microsoft Cloud Adoption Framework for Azure



Azure Launchpad closely aligned to the Microsoft Cloud Adoption Framework for Azure

# Drivetrain Automated Deployment

Azure Launchpad is built from the ground up using NS:GO/DriveTrain, our automated end-to-end provisioning and management platform. It automates all the work of deploying your landing zone, using native Azure technologies such as:

Blueprints Policies Templates Configs

NEWSIGNATURE

# Monitoring and Management

Azure Launchpad has monitoring and management built-in, out of the box. Whether you want to manage your environment yourself, or want New Signature to manage it for you, everything you need will be set-up, enforced, and ready to go.

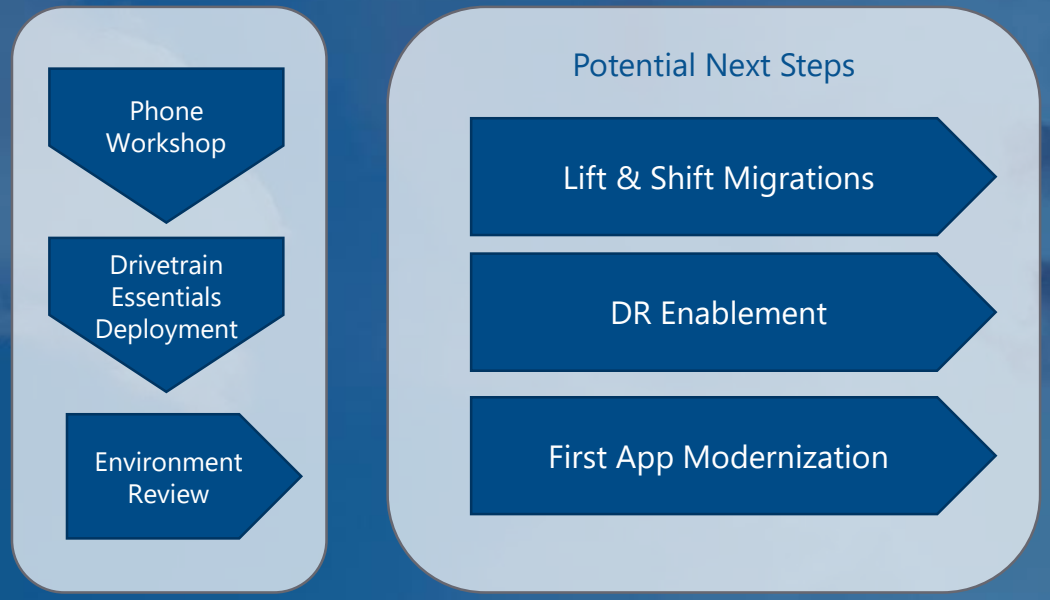
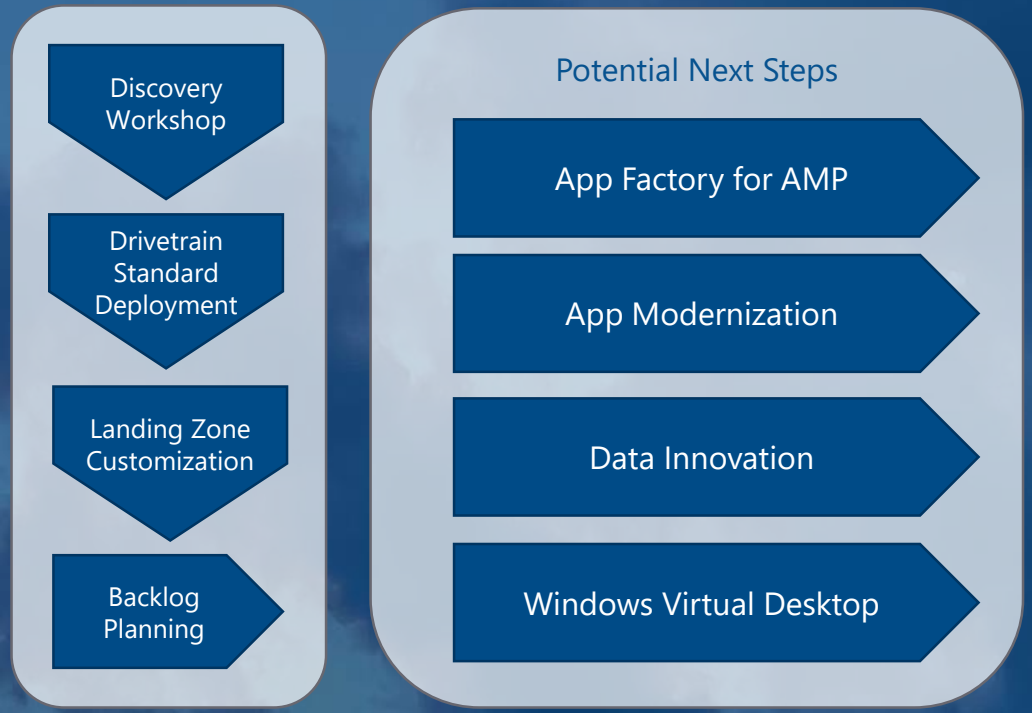
# Azure Launchpad Activities and Next Steps

## Essentials



- ✓ Proofs of concept
- ✓ Low availability requirements
- ✓ Smaller organisations

## Advanced

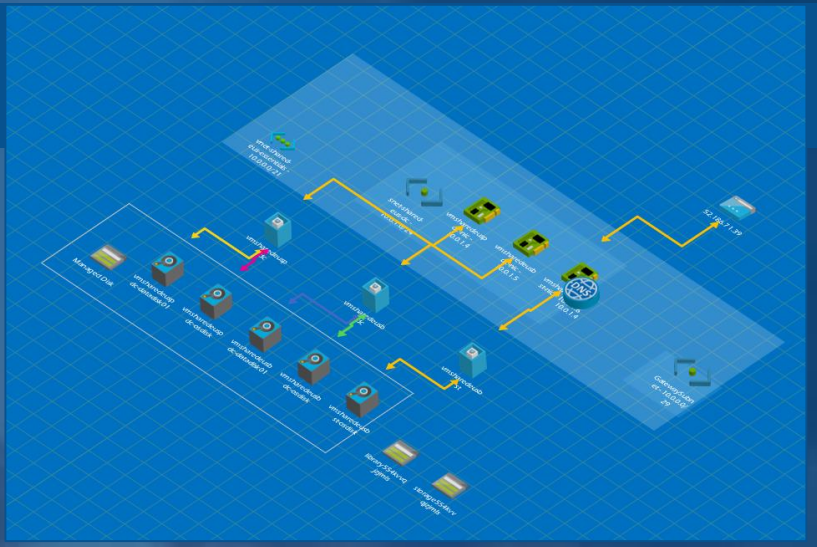


- ✓ Production pilots
- ✓ Higher availability requirements
- ✓ Mid size organisations

NEWSIGNATURE

# Azure Launchpad Documentation

As part of the landing zone, you'll be given a comprehensive handover document with full details of your environment along with all the resources, policies and other artefacts.



NEWSIGNATURE

New Signature's Azure Launchpad is available in three editions: **Essentials**, **Advanced** and **Enterprise**. Whichever edition you choose, it still has automation at its core. You'll be provided with all of the build artifacts as part of your landing zone. This ensures that as you migrate applications or build new experiences, the same controls and governance are enforced, getting your IT pros and developers productive, while also safe and secure.
