AILA Sensor Intelligence

arvato
BERTELSMANN
Arvato Systems

ADDED VALUE

→ Visualization of the plant condition - Condition Monitoring

→ Predictive maintenance is made possible

→ Early alerting with fewer false alarms at the same time

→ Independent marking of events - No data science expert required

→ Your plant knowledge flows directly into the AI and stays with you!

MODULES

Our AI platform combines various modules with already pre-trained models for the following areas of application

→ (IoT) Sensor Intelligence,

→ Computer Vision, and

→ Text Intelligence

AILA

AI & Data Science

We support you in building AI and Data Science solutions. Our services cover the entire lifecycle - AI consulting, setup of your MLOps platform, and use case implementation.We automate decisions in your specific application contexts through a successful combination of algorithms, methods and data.
