

Create more efficiency and satisfaction in your hybrid working teams

ABOUT HYOFFICE

With the hyOffice app, your team can see exactly who is in the office for a meeting and who joins virtually - e. g. from the home office. Face-to-face contacts and spontaneous gatherings are promoted, and a culture of hybrid working is strengthened at the same time.

See what customers are saying:

"With hyOffice, the exchange in my hybrid working teams has become much better again. Everyone knows exactly who is in the office and when, and I have a great overview of the utilization in the office. My team is more productive and more satisfied."

– Steven, Team Lead Collaboration Solutions

WHAT WE OFFER

The hyOffice app for Microsoft Teams is the central dashboard for your employees. Through the corporate account, the user is already logged into Microsoft Teams via single sign-on. No additional login is necessary.

An automatic check-in mechanism ensures reliable data. Your employees can concentrate fully on their work. Manual and thus often forgotten logging in at the workstation in the office is no longer necessary.

Data protection is a central requirement at hyOffice. The design principle of "privacy by design" is paramount in the development of the software.

hyOffice is perfectly integrated into your Office 365 and azure landscape. All your data is secured within the Azure cloud.

And best of all: Our solution can be purchased as SaaS on Azure marketplace!

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
