

Powering childcare operators

ABOUT NEMBØRN:

Nembørn is the proven white label platform built for nursery carriers.

With extensive customization and powerful pedagogical features, we have built a powerful, integrated and supported solution for nursery carriers.

See what customers are saying:

"The white-label solution of Nembørn is exactly what we needed to modernize our nursery management while maintaining our own brand integrity. Now over 10.000 parents are connected to our nurseries across Germany, using the Kinderzimmer apps daily to communicate and collaborate with us."

-Melf Kruse, CFO & Co-Founder, Kinderzimmer

WHAT WE OFFER

Our digital solution, Nembørn®, is a white label platform for nursery enterprises which digitalizes and streamlines administrative work. Through helping parents, nurseries, and teachers with removing administrative obstacles, providing better ways of collaborating, and giving them a centralized nursery management system, we can improve many aspects of nurseries, thus resulting in pedagogical excellence.

Document the child's development through our advanced progress management tools, where a holistic development is promoted. Improve the communications through newsfeeds and messaging to keep parents informed and included in the childcare process. Through these features, Nembørn® facilitates partnership and communication between parent and teacher, thus ensuring a better development for the individual child.

Our administrative system makes it easy for nursery enterprises to control and run their settings from one central, vertical ERP system. This provides a simple yet all-encompassing overview of the enterprise from which to manage its workforce, finances, structure, and direction.

To ease the every day, we have developed dedicated apps for both parents and teachers. The two apps increase the collaboration between parent and teacher by allowing for two-way communication, updating and planning events, documenting child progress and much more. Through our apps, the quality-of-life features such as digital attendance and registration are easy to use and manage.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
