

# Power Platform Adoption Assessment

## Deliver an excellent user experience and increased business value inside your company

Power Platform’s low code approach to solution delivery has enabled thousands of organizations around the world to use technology to transform their business. It does this by enabling more people than ever before to create applications, integrate into their larger enterprise and to leverage mobile platforms and artificial technology to transform organizations with new ways of working. This half day assessment will help identify the maturity of your current Microsoft Power Platform usage and to prioritize actions for the areas of improvement which we can use to support your adoption program.

### Agenda

Get started  
Project team  
Executive Sponsorship  
Adoption strategy and vision  
Success Criteria  
Readiness

### Who should attend?

Include CEO, CIO, business decision makers (BDM), executive-level sponsors, managers, and individual contributors.
