# Managed Microsoft XDR

Microsoft Security

An Integrated Cybersecurity Solution

A complete 24x7 managed security solution leveraging the Microsoft Defender ecosystem of capabilities to keep your organization secure. This includes Microsoft Defender for Office 365, Microsoft Defender for Endpoint, Azure AD Identity Protection, Microsoft Defender for Cloud Apps, Microsoft Defender for Cloud, Microsoft Defender for IoT, Microsoft Sentinel, and Insider Risk Management to protect your identities, endpoints, cloud apps, email, and documents from advanced attacks, malware, and data breaches.

Protection across the attack chain – insider and external threats

The value of Managed Microsoft XDR

- Delivers 24x7 Cybersecurity Expertise to the customer at a fraction of the cost of setting up an internal SOC.

- Reduces noise from alerts and false positives

- Allows IT analysts and teams to stay focused on day-to-day activity.

- Provides actionable intelligence on high severity threats.

- Delivers trusted and ongoing monitoring of all threats and malicious behavior.

Investigate
Microsoft Defender for Identity helps Dell Technologies analysts investigate the full path of an attack based on shared signals.

Respond
When a breach is detected, Microsoft Defender for Endpoint executes an integrated response with Dell Technologies analysts to stop damage.

Remediate
By combining the power of an Extended Detection and Response (XDR) solutions with the expertise of Dell Technologies cybersecurity analysts, you can have confidence in the security of your environment and receive help to mitigate threats effectively and quickly.
