Help to minimize time, costs and exposure associated with breaches in your cloud environments.

Breaches of cloud environments are a fact of life and require a unique response approach that combines traditional forensic methods with cloud native tools and skills.

The X-Force team is comprised of industry-leading, highly skilled incident response professionals experienced in investigating compromises of on-prem, cloud and hybrid cloud environments.

X-Force also provides proactive service offerings for cloud such as maturity assessments, development of IR plans/playbooks, training and simulation exercises.

This approach helps organizations prepare for, detect, and respond to security incidents in cloud environments more efficiently and effectively. It also helps minimize revenue loss and recovery costs associated with a security incident.
