Drive Innovation with Cloud Native App Development
6-week Implementation

CloudIQ helps businesses envision new products, create innovative business models, and deliver the next level of customer experiences by leveraging the latest cloud-native technologies.

As a Microsoft Solutions Partner (Infrastructure, Data & AI, Data & App Innovation), CloudIQ can help you build cloud-native applications to stay relevant and ahead of the competition.

Enterprise-Ready AKS Implementation

Build and deploy modern, scalable, and resilient cloud-native applications on Microsoft Azure. Achieve faster time-to-market with our prebuilt accelerators and well-defined set of best practices.

1. Overview on Cloud Native Development

- Cloud-native design strategy
- Best practices
- Scale
- Cost efficiency

2. Identify Use Case

- Identify business need & minimum viable product functionality.
- Cloud-native App Design

3. Provision Outer Architecture

- Utilize CloudIQ's readily built accelerators.
- Provision & deploy the outer architectural components.

4. Deploy App to AKS

- Deploy the app to AKS.
- Follow modern DevOps practices.

5. Next Steps

- Guideline on how to leverage CloudIQ's outer architecture.
- Guideline to create cloud native applications.

Let us help you unlock the power of the cloud
