Microsoft

The future of project management is here

Welcome to **Microsoft Project Online**

Do you struggle to guarantee the successful management of projects, have a poor view of project status and scope and find it difficult to ensure that a project aligns with strategic business goals?

Do you have poor cross-departmental visibility and control over projects and difficulty accessing the data and resources you need to deliver projects on time and budget?

Then you need Microsoft Project Online. It works seamlessly with Microsoft Office 365 to give you a uniquely comprehensive set of scalable, cloud-enabled, digital tools, so every project is joined up and optimised for results, right from the get-go.

Conceptualise.
Empower teams to think creatively about challenges and translate that strategy into actionable goals

Plan.
Start the right projects at the right time by managing resource demand and assignments

Execute.
Support teams to become self-reliant and assess the impact of new and updated projects

Collaborate.
Drive better outcomes with more connected teams using familiar collaboration tools

Visualise.
See data in new ways, connect insights faster and make more informed decisions from anywhere in the world

Control.
Manage projects your way, using intelligent Project Portfolio Management (PPM) tools

Explore the advantages it delivers, overleaf.

For a smarter future, just add Project Online

Microsoft

Unify management and transform productivity: Manage all your projects within Project Online for business-wide consistency and efficiency, with no integration issues.

Turbo-charge collaboration and productivity: Built-in templates and tools alongside native Skype for Business, Microsoft Teams, Power BI and Excel open up team collaboration and drive productivity.

Accelerate ahead: It's easy to set up and kick off new projects and change their nature, scope and scale on the fly.

User-friendly interfaces: Everyone is quickly up and running while smart scheduling features, charts and pre-populated menus simplify planning and reduce training.

Comprehensive, visual report sharing: Intuitive reports, including burndown charts and financials let you quickly aggregate portfolio data with LOB systems.

Proactive resource management: Automated tools help you identify bottlenecks, accurately forecast, heatmap and lock in resources, and improve project selection and delivery.

Effortless strategic alignment: You can model portfolio scenarios to pick the best strategic path and weigh proposals against business drivers, cost and resource constraints.

Even more advanced productivity and navigation features are being added in April 2019

"With Project Online I can tell the CEO exactly what's going on without having to chase anyone. The information helps with challenging my directors, exposing inaccurate project forecasting and highlighting any skills shortfalls that need to be addressed". *Andrew Clarke, Group CIO, Arcadia.*
