

Office 365 SharePoint Online: End User

WorkshopPLUS

Duration: 3 days | **Focus Area:** Upgrade, Migration and Deployment | **Difficulty:** Advanced

The WorkshopPLUS Office 365 SharePoint Online: End User addresses the depths of Microsoft SharePoint Online site management, security, collaboration features, and more. Through presentations, white-board discussions, and goal-based labs, This three-day WorkshopPLUS will provide the SharePoint users and site administrators the skills to walk away with a firm grasp on the technical concepts required to successfully administer and use this world-class collaboration infrastructure.

Each group of modules is organized by scenario and is designed to provide the participants with in-depth expertise on tools and hands-on experience to administer and work with SharePoint Online sites and features.

◆ OUTCOMES ◆

01 SKILLS

- Understand SharePoint Online site and collaboration features.
- Manage site collections, site templates, security, site features, list and libraries, and site data.

02 BEST PRACTICES

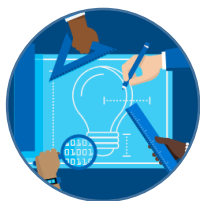

- Work with Web Parts, apps, content types, site columns, the search interface, object sharing features, and more.
- Translate the SharePoint Online site collaboration features to your everyday business needs.

03 WAY FORWARD

Recommendations and guidance on how to apply the knowledge acquired to resolve real problems at the workplace

◆ CAPABILITIES ◆

Hands-on, interactive learning with expert instructors in a classroom environment.

OUR EXPERTISE

Learn from industry experts that help enterprise customers solve their most challenging problems.

HANDS ON

Practice the concepts you learned in the classroom by engaging in hours of hands-on lab exercises.

IN-DEPTH LEARNING

Deep technical training that equips you to overcome challenging problems in the real world.

AGENDA

This WorkshopPLUS runs for **three** full days. Students should anticipate consistent start and end times for each day. Early departure on any day is not recommended.

Module 1: Site Administration

In this module, you will learn the difference between site collection and site administration settings and the various administration user roles. Also, you will explore the various site templates available for use and the best practices around site taxonomy and structure.

Module 2: Securing Content

In this module, you will understand site and object security options such as permissions, permission levels, groups, the inheritance model, and the external user sharing.

Module 3: Lists and Libraries

In this module, you will take a deep dive into working with lists and libraries, list templates, columns, views, versioning,

check in/check out, and alerts.

Module 4: Working with Content

In this module, you will explore the powerful content management features such as content types, site columns, managed metadata, policies, the search interface and more.

Module 5: Web Parts and Apps

In this module, you will gain insight into working with the available Web Parts provided with SharePoint Online products and learn how to leverage SharePoint Apps.

Module 6: Productivity Features

In this module, you will dive into working with Office 365 Video, OneDrive for Business, and Delve features that are included in Microsoft Office 365 and SharePoint Online.

ADDITIONAL DETAILS

Target Audience

This WorkshopPLUS is intended for users of SharePoint Online, who would like to learn more about the features and capabilities for End Users to use SharePoint Online.

To ensure the high-quality knowledge transfer expected by the attendees of this three-day WorkshopPLUS, the class size is limited to a maximum of 16 participants, and recommended that the participants meet the following criteria:

Users who are familiar with the concepts of how to upload and download files from SharePoint, and would like to learn more of the capabilities of the platform.

Hosted Requirements:

Participants will need a computer running at least Windows 7, with 50 GB free drive space, a USB port, a 10 Mbps or faster network adapter, at least an evaluation copy of Office 2010 Professional or later, and a PDF reader. Participants also need a Microsoft/Windows Live ID to connect to the virtual environment. The classroom must be networked, with access to the Internet and at least total Internet bandwidth of 2 megabits per second. TCP port 443 must be open. We highly recommend a wired network in the classroom.

NEXT STEPS: If you are interested in this workshop for your organization, contact your Microsoft Account Representative.
