PeopleSoft to Azure Migration 5-Day Assessment

For migrating your PeopleSoft apps to Azure as part of your Digital Transformation journey

Enterprises are moving their PeopleSoft applications from on-premises to Azure cloud to capitalize on the Azure edge in terms of security, scalability, and cost-efficiency. FyrSoft's 5-day assessment provides an in-depth analysis of PeopleSoft on-prem apps to Azure migration, right from evaluation of your existing PeopleSoft apps to executing the migration seamlessly. The workshop's outcome aids in defining & establishing a cloud foundation that aligns with customer's business objectives.

PeopleSoft to Azure Migration 5-Day Assessment Offering:

The 5-Day assessment by FyrSoft provides businesses with all the required knowledge needed for migrating the PeopleSoft applications from on-prem to Azure. The offering enables customers to evaluate the potential gaps that ultimately help optimize resources. Our PeopleSoft to Azure Migration Assessment workshop explores the below-mentioned aspects.

Evaluation	Ready	Manage	Plan
• Aids in understanding the customer's current PeopleSoft apps • Helps in gathering comprehensive data on components like application servers, databases etc. • Aids with a server workload report of the existing landscape • Helps in gathering information about the customer domain	• Sizing exercise for the Azure migration • Allows customers to decide the storage options on Azure cloud • Aids in targeting the first workloads for migration to the Azure platform	• Helps in determining the migration approach • Aids in estimating the cost for migrating the apps to the Azure cloud	• Helps in determining the migration plan of the PeopleSoft applications from on-prem to Azure environment • Establishing the outcomes of the assessment report
