Our IT Solution Architects provide consultancy, planning, architecture, implementation, and support of a wide range of IT and Datacenter solutions. Our experts will provide your team with The BEST practices and guiding principles to a successful implementation, for which we will always commence with a DLD that contains a tailor-made Architecture Schematics, SOW, and TOC.

We Believe in Taking Action

With all the newest technologies and solutions for cyber protection, the modern network can still be breached, and because of that you need to be aware when you're under attack. But you also need to be able to defense and remediate against it. That's when we come in - Active Security Intelligence is an integral part of your defense strategy for early detecting targeted attacks and reducing their impact.

As part of their security intel, businesses require a comprehensive view of all that occurs in the business network and resources. For that, businesses need both time & skills to understand the different happenings in their technological environment and the outcomes. In DEXCYBER, we define, deploy, and deliver high quality solutions to simplify this complex task for you.

DEXDATA&AI helps you modernize your legacy stack and align it with the latest technologies such as Cosmos DB, Azure Modern Data Warehouse, Azure Big Data and Analytics, Azure Synapse, Azure Machine Learning, Power BI, and Azure IoT. All for giving you The BEST solutions for your business needs – always following The BEST Way!

Today, organizations across the range of industrial verticals want to generalize machine learning and AI capabilities to solve complex business problems and increase the value of their products. Using the power of advanced analytics, machine learning, and AI, you can derive insights to help optimize operations, drive innovation, and deliver value to the company.

Our Cloud Solution Architects provide consultancy, planning, architecture, implementation, and support of Microsoft Data, AI, and ML solutions running on Azure. Our experts will provide your team with The BEST practices and guiding principles to a successful implementation, for which we will always commence with a DLD that contains a tailor-made Architecture Schematics, SOW, and TOC.

As Microsoft's provider, we supply our customers with Microsoft Cloud Solution Provider Program (CSP). The program is designed to provide you with Microsoft's public Cloud subscriptions such as Azure, Office365, and Microsoft's security solutions.

But it is more than just a licensing platform; within CSP you get a full managed services package that include licensing, support, consultancy, and billing in a flexible module with a monthly invoice directly from us - and it's all included in your monthly Microsoft Cloud consumption!
