ebankIT OMNICHANNEL DIGITAL BANKING PLATFORM

RETAIL, SME, BUSINESS & CORPORATE

CUSTOMER & MEMBER CHANNELS

A complete Omnichannel Digital Banking suite for a fully-featured, high performance and secure experience. Optimized, frictionless digital customer journeys, from onboarding to payments, across all channels.

FRONTOFFICE CHANNELS

Available as an option, the Branch Frontoffice/ Broker Portal, Contact Center and Live Assistance extend the Omnichannel experience to enable fast and super-efficient customer service.

BACKOFFICE CHANNELS

Being digital is more than having digital channels, the platform comes with a full backoffice suite. Tailor the solution, manage the experience, launch campaigns, analyze data, all through the ebankIT Management System. It also includes a world-class full lifecycle cross-platform content management system and an advanced Monitoring Center for operations monitoring.

ebankIT BUSINESS LAYER

Our rich business-focused middleware connects and orchestrates all the channels to the core banking system. The ebankIT middleware enables seamless customer onboarding, configurable alerts, notifications and a flexible template processor. The Security Center provides advanced multi factor authentication and the Store & Forward module can provide 24/7 customer service even when the core banking system is offline or unavailable.

ebankIT STUDIO

A low-code fully Integrated Development Environment (IDE) that enables the rapid deployment of high quality, secure and robust banking application features.

ebankIT INTEGRATION LAYER

While the ebankIT solution is core-agnostic it comes with pre-built connectors for many of the popular core banking systems. The integration layer abstracts and maps core data models into ebankIT providing fast and efficient core connection.

ebankIT API GATEWAY

An Open Banking interface for bidirectional connection with external systems, fintechs and 3rd parties to provide customized digital services to your customers.
