

Move specializes in IT infrastructure. We provide cutting-edge expertise, services and solutions to public and private companies throughout Norway. Through design, integration and management, Move contributes to providing businesses with a cost-effective, secure and flexible IT infrastructure based on the best market solutions and services currently available.

Move is a consulting company, system integrator and service provider.

- **Move Consulting** is one of the major IT competence environments in Norway with unique expertise within a wide range of solution areas. Our goal is to maintain a high availability of expertise to quickly deliver consulting capacity to our customers.
- **Move Solutions** is one of the country's leading system integrators. Through consulting and design, we offer our customers solutions tailored to their business, always based on leading technologies and services.
- **Move Operations** is a Multisource Service Integrator that delivers "best of breed" services. We provide the integration of services with existing solutions and the management of all or part of your company's IT solution from our operations center in Oslo, regardless of whether the solution is on premise, in a data center or in the cloud .
