

Autonomous Cloud Lifecycle Management

Matilda Cloud is a unified platform with a proven suite of tools to help transform your infrastructure and applications to the Azure. We automate discovery, migration and cloud ops for applications, business workloads and IT services optimally in Azure

Matilda Cloud platform features include fully automated discovery and migration into Azure with 6R strategy and modernization. We enable autonomous lifecycle management for the applications once in Azure. Our platform allows to efficiently, optimally and intelligently run workload and application in Azure using predictive AI/ML to create uptime, high availability and scalability for your applications in Azure.

Why customers use Matilda?

- Unified platform for Transformation and AIOps.
- Breath of features allow for full lifecycle management.
- Self Service Intuitive Tools.
- Deepest data discovery in the Industry.
- Proven for Security, Flexibility Scalability and Compliance.
- AI/ML driven demand modeling, optimization and SLA delivery.
- Uptime, Scalability and optimization of resources.

We promise you...

That we deliver guaranteed business benefits transforming your IT to the Azure Cloud **faster, easier and securely**. We will right size it from Day One!

Choose one-time PoV for FREE

You can choose to either discover your environment end to end OR Optimize your environment as part of the PoV.

The platform provides huge value proposition, and we seamlessly migrated our enterprise applications to the cloud in a secured manner that met all of Verizon's security needs as well as it helped in saving the templates so that we can perform this task using the platform repeatedly. We were able to meet all the objectives related to the cloud journey. Matilda platform has helped us in successfully automating application deployment.

- Steven Watson, Cloud Director, Verizon Enterprise

Matilda Cloud enables you to **automate** and **manage** the full lifecycle of your Cloud transformation to the Azure Cloud.

Matilda DISCOVERY

- Agentless deployment with 360° view of in dept application assets and its dependencies in real time
- In depth analysis for compliance with built in security and TCO analysis
- Cloud Disposition using 5R strategy supporting multi cloud

Matilda DevSecOps

- Map software release flows and optimize your DevOps
- Use the pre-defined templates to optimize and jumpstart automation
- Leverage your existing automation. Integrated with 40+ ITSM and Dev Tools

Matilda Migrate

- Migrate applications, workloads and infrastructure in hours vs months
- Supports all 6R and modernization of application during migration
- Create a customized plan and automation for each migration based on criticality and dependencies

Matilda AIOps

- Powered with AI/ML for predictive and self healing from exceptions of application
- Simply define your SLA and rest of the operations will be done automatically
- Operational efficiency and Cost for upto 30%

Matilda Optimize

- Saves over 30 to 50% in cloud cost using real time optimization
- Cost optimization can be autonomous or manual (actionable list)
- Real time scaling up and down to optimize resources

Get the best from Azure Cloud – and deliver differentiated Digital experience

- Automate cloud transformation with 10x acceleration
- Improve your productivity and accuracy by 3x with automation for application operations in Azure
- Reduce cost by 30 – 50% with efficiency, ease of use and optimization

Move to Azure Cloud with Confidence!

- ✓ Automate your transformation to Azure
- ✓ Prevent IT problems before they happen
- ✓ Boost productivity with streamlined and automated Operations
- ✓ Protect your bottom line by avoiding Service interruptions
- ✓ Get the best RoI from your IT Investments
