

Office 365 Adoption Workshop

A 15 Days workshop: Explore quick and easy ways to take collaboration and productivity to the next level

Overview

Is your organization driving full value from your Office 365 / Microsoft 365 investments? You can take your organization's collaboration and employee productivity to the next level by leveraging the Office 365 and Power Platform features in newer ways. Through this workshop, uncover the new scenarios in your organization and empower your teams to organize and automate these scenarios using Office 365.

How it works

- Understand the business problems and challenges in using the Office 365 Apps
- Gain insights on the current usage of the Office 365
- Assess the adoption maturity and plan the workshop
- Walkthrough of sample use cases and its benefit for the departments
- Identify live use cases and implement them
- Assist the SPOCs to implement one use case on their own
- Showcase medium complexity demos on Power Platform, Teams, SharePoint and engage them for the next level of implementation

What to Expect

- Pre-built use cases for faster roll out
- Department-wise pre-defined scenarios
- Live use case roll out to end-users for early adoption
- Insights on Adoption - Periodic review guidelines for the IT department
- Sample use cases - basic implementation to integrated solutions and advance solution with cognitive services already in place - Teams App, PowerApps, Automate, OneDrive, Planner, Forms, Streams, and SharePoint
