Consulting

Growth of Sales, Payroll cut, NPS, Budgeting (Optimizing and Investments)
Transparency & Efficiency of Top Managers,

Checklist

Apply the Unique Verification Inspection Methodology

The key QVALON system tool "checklist" solves three key business tasks

List of questions following the standards

Evaluation of the current process state

The user-friendly interface allows to quickly create and send a list of questions on the indicators of interest to the right department

Photo report of problems

Creating a photo report of any problems existing regarding business standards

Self-checklists allow staff to assess their level of awareness and to fill knowledge gaps

Analytics of issues

Storage of information in one place and analysis of key causes

Aggregation of information allows to analyze the issues and increase

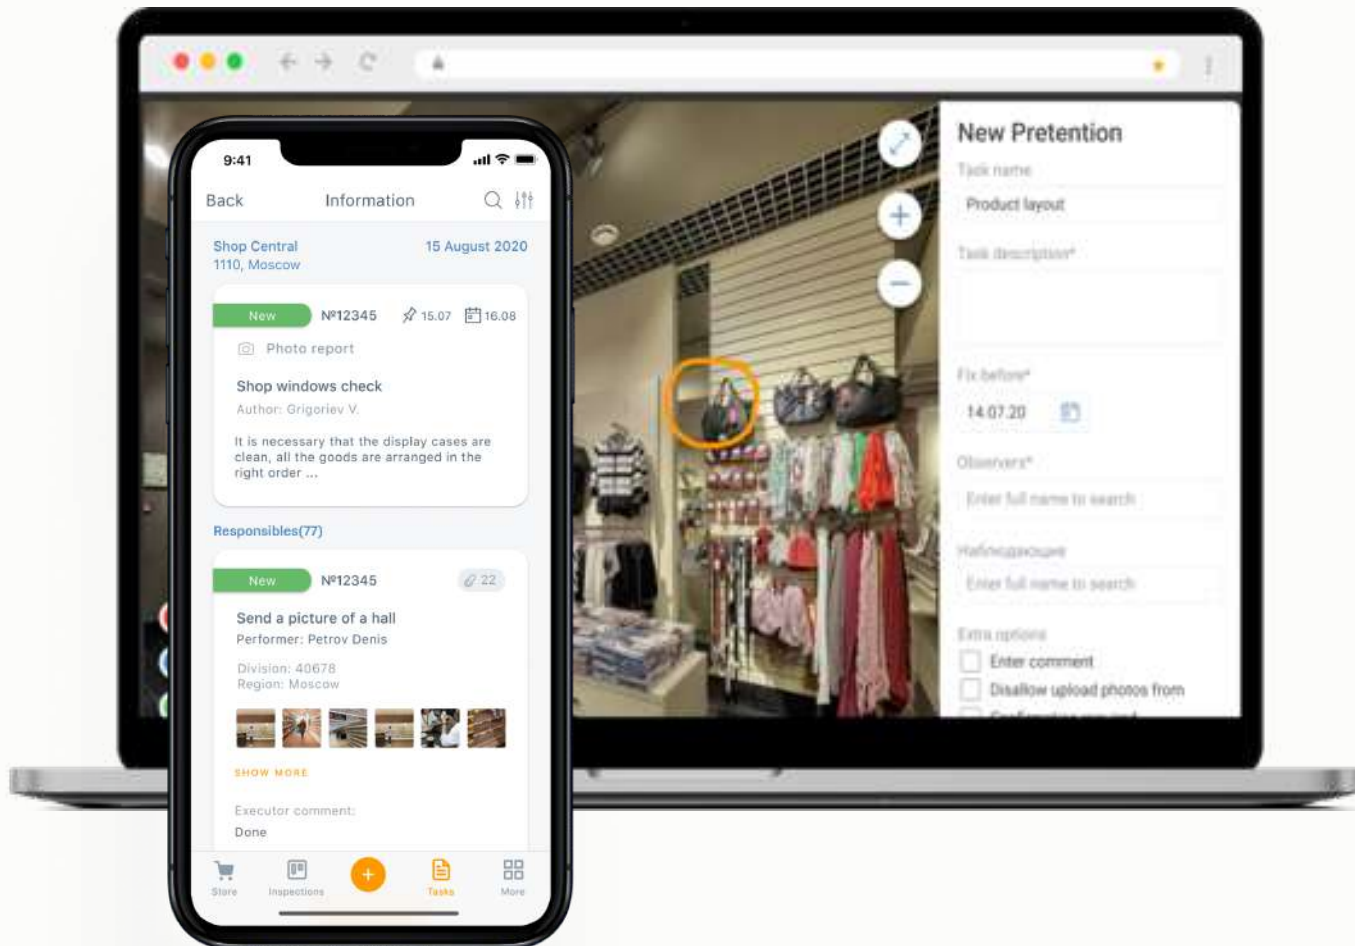

GPS managing

Controls of audits completion with GPS

GPS controller reduce the probability of low quality control from other locations

Photo Reports

Visual presentation of comments and work results

Create a single database of photo reports with comments and links to specific tasks and checklists

Use the built-in photo editor to highlight faults

Eliminate the possibility of providing false data by disabling the addition of images from your mobile device gallery

Create comments based on photo reports, assign authors and monitor the elimination of comments

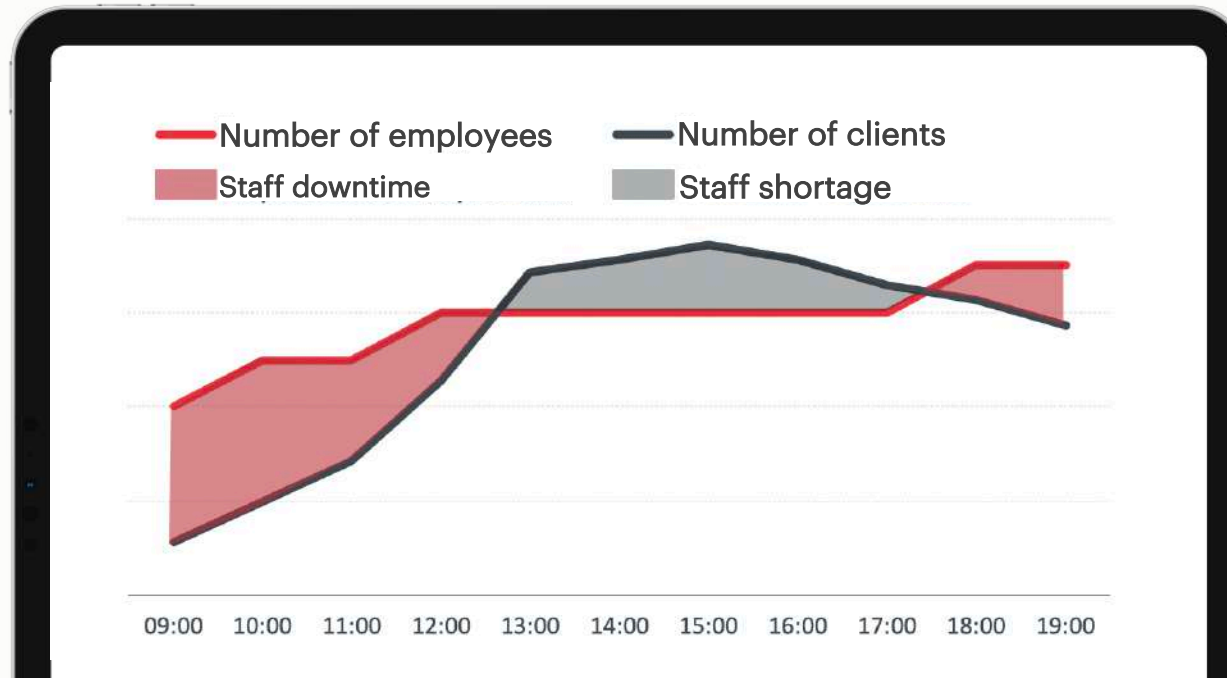

Browse through the photo report history to assess the effectiveness of eliminating comments

Staff Efficiency

Automatic Load Calculations -> Events, Sales
Workload forecasting taking into all specifics and
external factors with an accuracy of over 90%

Shift Exchange -> Force Majeure and Shortage

Personal Account -> Tasks, Performance, Salary

Time Tracking -> Efforts Monitoring & Accounting

- On arrival/departure/breaks, employees are logged in the system through face recognition.
- Store manager check schedule compliance in real time
- A timesheet with the hours actually worked for the month is automatically generated and uploaded to the wage calculation system

Analytics

Rapid data assessment and forecasting

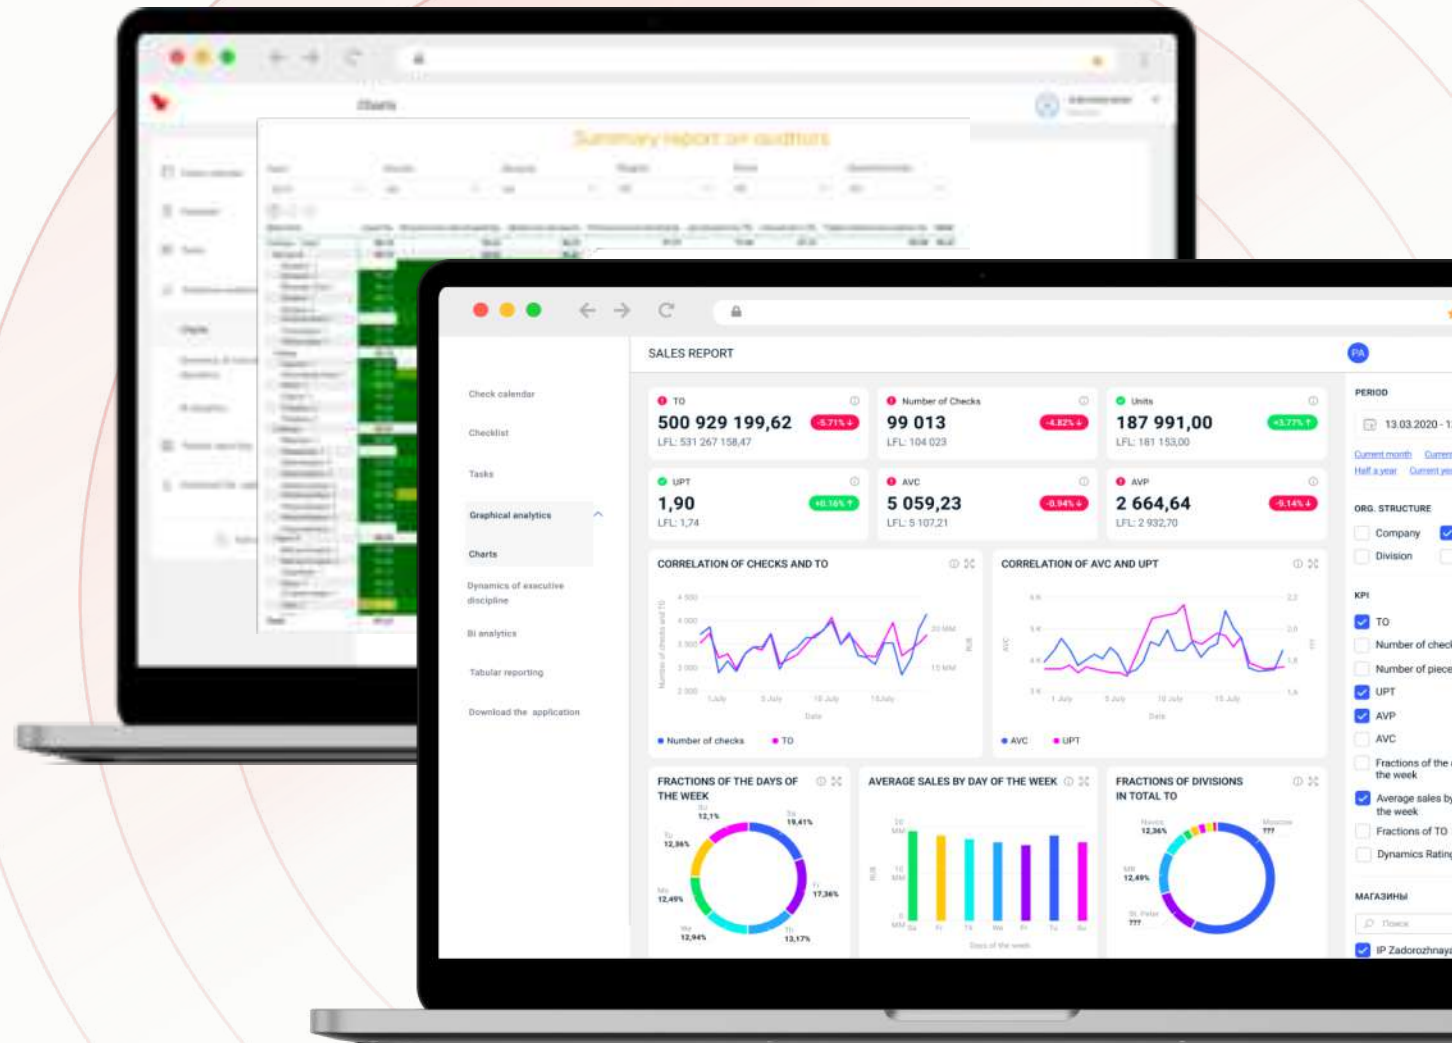

Identify outsiders and get additional motivation for development when viewing ratings by different business levels (from regions to specific locations and employees)

Find possible growth points and business risks based on analytical reports

Evaluate staff performance and talent pool online

Survey

Create free forms for data collection and implement many diverse business scenarios

The image shows the QVALON survey creation interface. On the left, a laptop screen displays the 'Questions' section with a list of four questions: '1 Enter your name' (Free answer), '2 Your job position' (Single choice), '3 Give me his name' (Free answer), and '4 Other question' (Multiple choice). On the right, a smartphone displays a survey titled 'Survey' with two questions. The first question is '1. Please rate the trade equipment. Does it match in quality with the photo' and includes four photo options and three radio button choices: 'Yes', 'No', and 'I am at a loss to answer'. The second question is '2. Is the music playing loudly in the store?' with two radio button choices: 'Yes' and 'No'.

-  Extended list of response formats: Photo, lists, date, number, etc.
-  The task is to fill out surveys for responsible, regular tasks.
-  A single registry of role-based survey templates.
-  Reporting on completed surveys, upload to Excel

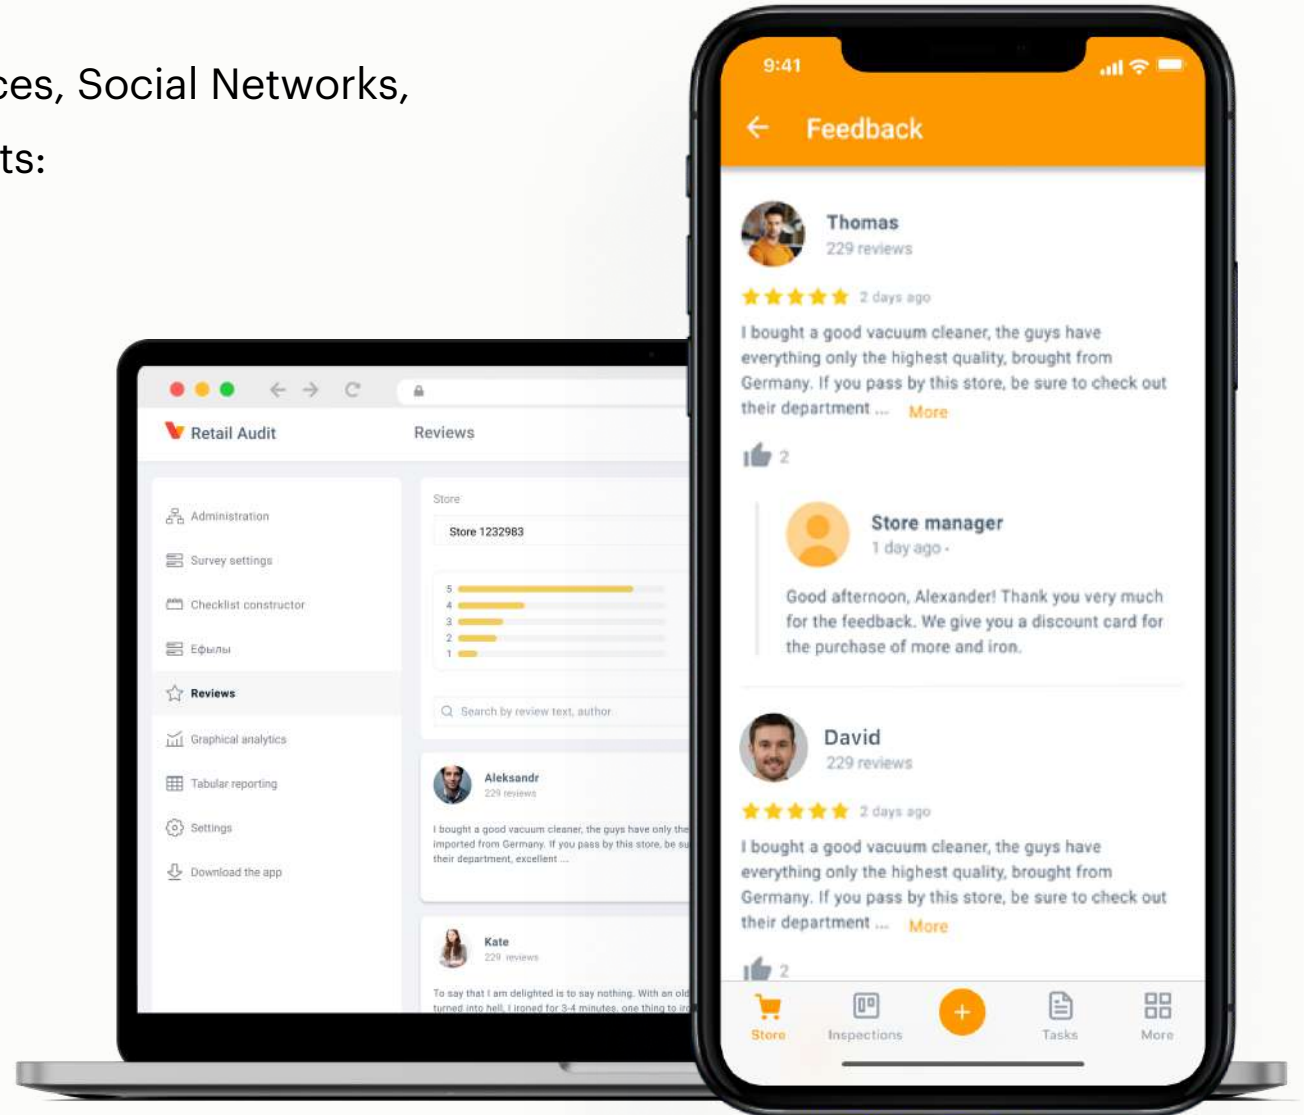

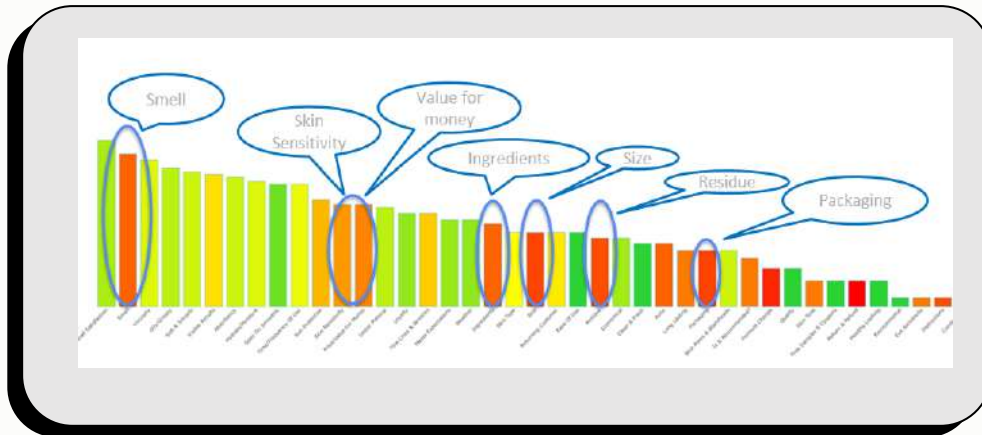

- Competitive Price Monitoring
- Employee Surveys
- Candidates Interview
- Shelf monitoring
- Order promotional materials in **stores**

Customer Feedback from Google Maps & other sources

Collect data from Google Maps, Marketplaces, Social Networks, Reviews, Forums, Chats in convenient charts:

- Problem Service Points
- Audience and Needs
- Opinion Trends
- Pricing Policies
- Comparison with Competitors
