

Continuous Delivery & DevOps Consulting Services

Develop and Deploy Software Faster to Accelerate Your Digital Innovation

OVERVIEW

During our consulting services, we will discuss:

How your business will benefit from rapidly releasing software and automating testing and deployment

Why your infrastructure and configuration should be treated as code, and why it should be part of your deployment pipeline

Why your people and your culture are critical to a successful DevOps implementation

What works in your current processes, what doesn't, and the plan to make impactful changes

OUR APPROACH

- We outline the key principles of Continuous Delivery and DevOps and the behavior of advanced teams
- We conduct a discovery session, together, to understand your current processes and outline the ideal outcome
- We develop a plan of action specifically tailored to your organization

OUTCOMES FOR YOUR ORGANIZATION

- Gain a full understanding of Continuous Delivery and DevOps principles, including an executive presentation for your organization
- Receive a detailed change management plan to guide your cultural evolution including release management, project planning, and selecting the right metrics to gauge success
- Receive technology enablement through tool selection, reference architecture, and training
- Guidance by an experienced consulting team that will ensure your successful transition
