

Migrate Modern Cloud Analytics

10 Week Implementation

TekLink.com is offering a 10-week implementation for your Modern Cloud Analytics as a change agent for creating Self Service Analytics and Data Consumption from anywhere.

TekLink is pleased to offer a 10-week implementation of Modern Cloud Analytics. Modern Cloud Analytics enables your decision makers and employees a cloud-based platform for gathering transactional, IOT and third party in a central Cloud Data Warehouse with visualization capabilities from Power BI or your tool of choice. Supported by Azure's robust cyber-security, your organization can rest assured of running a leading enterprise grade business intelligence platform.

Our agile deployment approach along with Microsoft's scalable and powerful technology enables both a rapid deployment and an affordable self-service analytics platform.

Key Solution Features

- Robust Analytics PaaS solution
- Utilize Microsoft Power BI's data blending capabilities
- Leverage Microsoft Azure Data Lake for cost-effective data storage
- Cloud based Infrastructure across Non-Prod and Prod environments
- Run and support from anywhere with your Azure platform and reduce on-premise footprint
- Scalable solution for growth and easily de-scaled for drops in data volumes
- Enable business to use self-service analytics and visualization of the selected data sets

Deliverables

- Setting up your non-Prod and Prod environments
- Up to 5 Power BI Reports or Dashboards
- Data sourcing from up to 2 systems and 10 ETL's leveraging Azure Data Factory (ADF)
- Build a foundation for future value-added increments
- Knowledge transfer session on data models
- 2-day Power BI training

Assumptions

- Client will provide agreed resources to conduct requirements, testing, and other project deliverables
- Assumes Client will have a subscription in place before implementation starts
- 2 environments Non-Production and Production with a single cut-over
- Data sources assumed to come from source systems such as SAP, Oracle, Salesforce.com, etc. Data cleansing and manipulation is a client responsibility

TekLink's Azure and Power BI Consulting Services Pricing varies based on requirements, number of applications, and existing maturity with cloud technologies.
