

Cost-optimized Power BI sharing tool.

What is PowerBI Portal?

PowerBI Portal is a web tool that allows users to embed any number of Power BI reports and dashboards on a portal that can be shared with whoever they want, regardless of being in their organization or even having a Power BI account with your own organization layout.

PowerBI Portal also optimizes Azure data consumption, resulting in tremendous savings of up to 80% for companies who rely on Power BI for their daily reporting needs.

Why customers use PowerBI Portal

- Provide a centralized access point to their organization's reports and dashboards
- Share Power BI reports and scorecards with people outside their organization
- Share Power BI reports and scorecards with users without a Power BI account
- Add an extra layer of security to their reports and dashboards
- Optimize their Azure costs

Problem: provide widespread custom access to Power BI reports

- You need to share your Power BI reports and dashboards with clients and other people outside your organization
- You need to filter the information each user has access to
- Your clients and employees need constant and centralized access to your reports

You need to provide access to your reports to several users

Solution: a portal with customizable access and viewing rights

- Customize the access to your organization's reports and dashboards
- Provide access to users outside your organization and without a Power BI account
- Apply custom filters to ensure each user only has access to the information pertaining to them

Customize access to your reports with a tailored portal

And there's more:

- Optimize your Azure costs by setting up a refresh capacity for your reporting service
- Add two row-level security layers to your reports
- Flexible login: let users access your portal using a Microsoft, Google or Facebook account

Share more while spending less

- A single PowerBI Portal license is enough to power any organization regardless of size
- Organizations only need 1 Power BI Pro license to start using PowerBI Portal

PowerBI Scorecards

Report sharing according to your needs

Share your reports with everyone

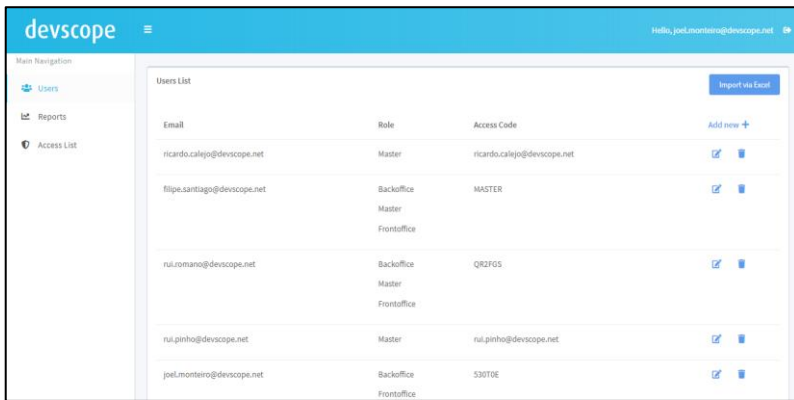

PowerBI Portal offers a tailored and unlimited report sharing experience to anyone, regardless of being in your organization or even having a Power BI account. You can share an unlimited number of reports and dashboards in PowerBI Portal with an unlimited number of users.

Optimize your hosting costs

Unlike regular reports, you can set a limited refresh capacity for PowerBI Portal that automatically turns the service off when inactive. If activity is detected, PowerBI Portal becomes available again, ensuring that your company only spends what it strictly needs.

Keep your information safe

Power BI reports and dashboards in PowerBI Portal support two instances of row-level security to ensure that your company's data is only shared with trusted collaborators or clients.

PowerBI Portal costumers:

With PowerBI Portal, you'll be able to:

- Create custom portals where you can share unlimited Power BI reports with anyone, regardless of being in your organization or even having a Power BI account
- Tailor the information available to each user you share your report with by applying custom filters
- Reduce your cloud hosting costs by only spending while your reports are active

Why DevScope?

DevScope is a consulting and software development company specializing in helping clients of all sizes and sectors stay competitive and get over both market and organizational problems. We implement agile and scalable solutions in multiple areas, including Digital Workplace, Machine Learning and Business Intelligence.
