

Head to your HomeOffice!

... with our cloud-based remote workplace at a monthly fixed price.

Do you want to enable your employees to work remotely out of their HomeOffice or during business trips in their usual work environment?

Do you reach your limits with your existing VPN solution and/or with your existing remote desktop infrastructure?

Do you have employees with high demands concerning CPU or graphics performance?

Remote workplaces have always been too complex for you in terms of administration or IT security?

citrix.services is the ideal solution for you:

- Fully integrated into your existing IT
- Using your current user authentication
- Integration of your software
- High-level IT security with multifactor authentication and rule-based access
- Fail-safe, if desired even with high availability
- Available for any type of workplace, even for intensive CAD usage

Starting **from 69€**/user per month.

Do you have any special requirements besides these?

No problem. We will adapt the remote workplaces individually in accordance with your requirements using our wide range of Add-On possibilities.

Start today. Within 48 hours your new work environment will be ready for use.

Concentrate completely on your core business — we take care of your remote workplaces!

Choose the right offer for your needs from our Basic, Professional or CAD-User packages:

Ideal for office workers	Ideal for graphics/ power workers	Ideal for CAD workers

plus, setup charges

999 €/one-time

Setup

The complete price of 999€ includes all preparatory activities, which are necessary for the seamless integration of citrix.services into your IT infrastructure. During the implementation we will connect our managed service with your systems, so you can for example easily access files from your file storage (file server), work with your enterprise resource planning or print documents from the cloud at your office. We will make sure that you can log in to our service with your usual company user credentials (Single-Sign-On). Together with your IT department/ IT service provider or after prior agreement, we will independently carry out all necessary adjustments in your IT environment to make sure that you can use our managed service without any issues.

Add-Ons

To adapt the products even better to your individual requirements, you can easily add additional functions choosing from the Add-Ons below.

*The following minimum purchase quantity applies: Basic package for 5 users. Professional package for 2 users. CAD package for 1 user. The price is calculated on a weekly working time of 40 hours per user.

Add-Ons

High availability	139 €/month
Roaming user profiles	3 € per month/user
More Bandwidth / Throughput	129 €/month
Rule-based access	1 € per month/rule
Active monitoring	5 € per month/user
Support	10 € per month/user
Office license	12 € per month/user
Windows 7 Support	possible, price upon request
Application delivery	one-time 99 € per application/ 99 € per application update
Surface devices	from 15 € per month

High availability

In order to avoid downtimes caused by critical updates or restarts, we offer you increased system stability with this Add-On — for uninterrupted access to your resources.

More Bandwidth / Throughput

In all packages you can access the services with a basic speed up to 100 Mbps to your own data center or server room, such as file servers or CRM-backend — with this Add-On we offer you more performance through an upgrade of up to 650 Mbps.

Active Monitoring

We fix malfunctions proactively when something is not working as planned — use our premium service for monitoring. Concentrate on your core business without the need to make a call-in case of major problems.

Roaming user profiles

Store your data centrally and continue working where you stopped previously — with roaming user profiles you will no longer have to think about where you saved files and documents.

Rule-based access

Enable your employees to print from our managed service on a locally connected printer or disable the copying of information between the devices of employees and your infrastructure — share your compliance requirements with us and we will implement them effortlessly for you.

Support

You will receive support as soon as possible, if your employees cannot sign in or other applications don't work as desired — use our professional technical support for inquiries concerning all problems of the devices your employees work with.

Office license

We provide you with the suitable licenses (already available from one user), if you don't have a license for Office or your current license doesn't support the use of the cloud — feel free to contact us if you need any further licenses.

Windows 7 support

It's no problem if you are still using Windows 7 and cannot upgrade to a later version, because your applications don't support a current operating system — until 31.12.2022 we can provide you with a Windows 7 environment, which is supplied with the latest security updates.

Application delivery

We integrate the applications that are in use by your company, easily and quickly into your subscribed environment at citrix.services — we take over the update maintenance with the latest manufacturer updates for you.

Surface devices

To enable your employees to work with a mobile device in the home office, we offer you with this Add-On a Microsoft Surface device at a monthly fixed rate. Including comprehensive equipment insurance and Microsoft Advanced Exchange. Have a look at the website of our Partner Surface. Love for further information and the complete selection of devices (<https://surface.love>).
