

## Simplifying the Roll-Out and Adoption of Microsoft 365

OneWindow Workplace is a revolutionary combination of technology development and adoption campaign experience, simplifying the way care teams, research groups, and administrative team members collaborate and communicate. Deployed across facilities, divisions, departments and programs, OneWindow creates consistency and personalizes content (News, Events, FAQs, Policies, Protocols), enabling individuals to quickly find the right information they're looking for. Built with the latest Microsoft 365 capabilities (SPFx, BOTs, Search, etc.) OneWindow drives organizational communications and establishes a governance lifecycle of SharePoint sites and Microsoft Teams.

### people

Business is driven by culture. Connect individuals, share knowledge and make each employee as effective as possible.

### content

Drafts are as important as finals. Organize processes, find resources and protect your intellectual property.

### data

Change is constant. Track efficiency understand usage and support your decision-making process.

# technology & support to protect your investment

## Branding

Take advantage of what Office 365 provides and match your healthcare corporate brand.

## Search and Find

Simplified search allows quicker filtering and identification of relevant content.

## Personalization

Provide your employees with the most relevant content they'd be interested in.

## Analytics

View and analyze critical data to determine your Office 365 adoption.

## News and Events

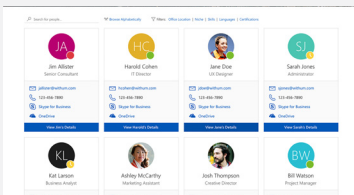

Have the flexibility to control how items are authored, unified and viewed across a flat structure.

## Bots & Business Automation

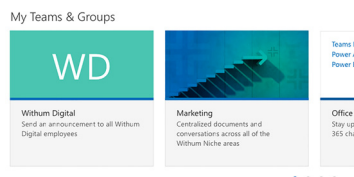

Interact with content (FAQs, HR Benefits, Protocols) to find answers and streamline business processes.

## advanced technology

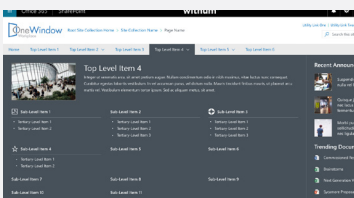

### Connecting to Employees

Search, find and connect with fellow employees based on key organizational attributes.

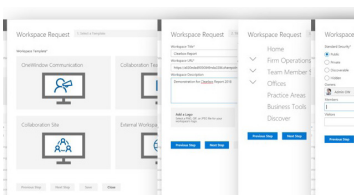

### My Teams, Sites & Outlook Groups

One place to present all Office 365 collaboration and communication access.

### Advanced Navigation

Beyond just a graphic representation, this navigation allows you to create a virtual hierarchy, provide built-in contextual elements, and is good looking.

### SharePoint & Teams Lifecycle Management

Guide your employees through the creation of SharePoint and Teams features based on pre-set templates. Manage approval, review and retirement.
