

MAQ Software

MAQ Software accelerates data-driven transformations for Fortune 500 companies. Using data analytics, cloud technology, and data science, we accelerate software initiatives that enable our customers to transform their industries. We help our clients build stronger customer relationships, drive sales, identify new opportunities, and analyze marketing results from our three engineering centers located in Redmond, Washington and India.

We are the largest 3rd-party publisher of certified Power BI visuals on AppSource and a Power BI Preferred Partner. Our customers benefit from our 10 Microsoft Gold competencies in data analytics, cloud, and data science.

Our customers choose to work with us because they are confident in our software delivery. Their confident result from our commitment to consistent outcomes, reduced time to market, and a transparent workflow. Our customers benefit from daily software updates, agile practices, domain expertise, and quickly implemented feedback.

Power BI Expertise

Since the launch of Power BI, we have been leaders in the Power BI community. Our entire team, from engineering to user interface and experience (UI/UX), is trained in the platform. The Microsoft Power BI team has reviewed and certified 29 of our custom visuals. Based on our experience in implementing over 5,000 reports on Power BI platform, we have published a comprehensive [Power BI Best Practices](#) guide. Developed 39 Power BI custom visual with 2 million downloads on Microsoft AppSource. Git repository: <https://github.com/maqsoftware/PowerBI-visuals>
