BOLDBuild

Lay a firm foundation by connecting the key-components of any Architecture, Engineering or Construction (AEC) business .

- Poor communication in the field often results in delayed executive oversight and increased rework. Improved visibility, communication, and access to critical project data would pave the way for better project management and reduced overhead costs.

- **BOLD**Build is a packaged solution that connects project teams out in the field directly to the office. **BOLD**Build is a robust platform that aligns and addresses key components of architecture, engineering and construction businesses.
