

Dynamics GP Upgrade & Migration Paths

Dynamics GP Upgrade Programs

• SOLUTION 1:

Upgrade to a NEWER version of GP. JourneyTEAM has developed a rapid-repeatable process that gets your organization to the latest Dynamics GP version — quickly.

What use to take WEEKS can now be done within hours.

• SOLUTION 2:

Migrate your Dynamics GP to the latest version of Microsoft Dynamics 365 Business Central. This is the core ERP technology of Microsoft. It's the future where you get all the benefits of a modern data center, protection from ransomware, strong authentication, and AppSource support. Business Central lets you work from anywhere — in the cloud.

Using an Older Version of Dynamics GP Leaves Your Organization Vulnerable

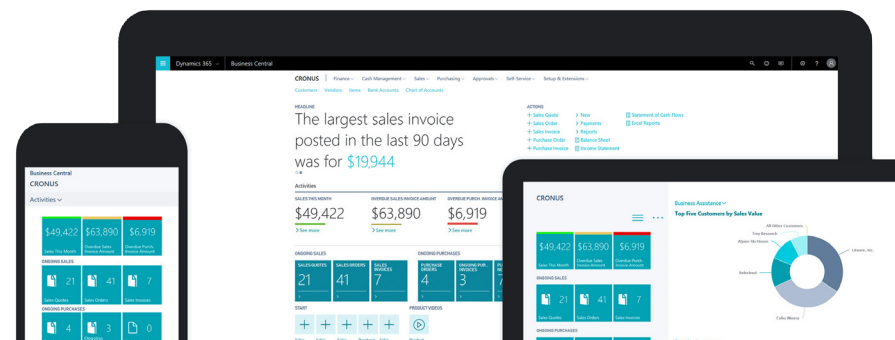

Have you gotten hopelessly behind on Microsoft Dynamics GP maintenance updates? If so, you're vulnerable to *ransomware*. Your data, reports, and devices could get stolen and shut you down for days.

Everyone is moving to the Cloud

Your customers and competitors are there. In fact, all your trade partners are there. Have you made the transition or are you being left behind?

Let's Talk

JourneyTEAM has been a Dynamics 365 partner for more than 20 years and is the US Partner of the Year for Business Central. Let's talk about your unique situation and what can be done.
