Windows Virtual Desktop- Proof of Concept 1 week

FLXA365 offers a free proof of concept for testing Windows Virtual Desktop in a test environment or in your own environment alongside the support of our experts.

We are a Microsoft Silver partner that provides a world-class Azure service in this proof of concept. Our high WVD expertise will ensure you get the best WVD environment usage experience from anywhere, on any device with Microsoft 365 security capabilities. FLXA365 will work with you to define the scope of the custom POC for your business.

Our POC offering includes

1. Define the POC scope.

2. Configure the required Azure infrastructure (in a test environment or in your own environment)

3. Configure WVD host pools

4. Publish up to 3 apps and assign them to POC users (up to 5)

5. Safety settings in Microsoft 365

6. User testing

7. Conclusion of the POC and next steps

Why you should try FLXA365's WVD POC offer:

1. Try WVD with a better assured experience.

2. Allow users in your company to experience WVD before deciding.

3. Test in a sandbox or in your Azure environment.

4. Zero cost of services (Azure costs as applicable)

5. Predictable delivery planning along with quality support.
