

# Windows Virtual Desktop

Your workstation anywhere and anytime

## WHY USE WINDOWS VIRTUAL DESKTOP?

- › Increased employee efficiency & satisfaction
- › Easy & fast deployment
- › Improved cost efficiency
- › Improved security
- › Pay-as-you-go model
- › Free extended support on Windows 7

The efficiency of your employees is largely related to the availability & performance of their workstation. Issues such as not being able to connect to files, updates on the OS and decreasing performance reduce the efficiency of your employees drastically. In addition, actions such as working from a private workstation are a potential threat for confidential information.

## What is a Windows Virtual Desktop?

A Windows Virtual Desktop enables you to access and use your desktop and apps from any device. By logging in with your credentials you have your desktop available anytime and anywhere, without any loss in performance or user experience and without security threats, even on your smartphone.

## What is the added value for you?

The Windows Virtual Desktop provides you with a fully scalable Windows 10 experience for all your employees. This includes bringing all your Microsoft 365 applications and other applications fully optimized to any device at any time. The WVD solution will enable you to get your new and existing employees up and running in a matter of minutes and at a fraction of the cost by providing a thin client and a user account. What's more, you receive free extended security updates on Windows 7 and are able to transfer your existing licenses without additional costs.

### Improved workforce efficiency

#### Performance

- › Available anytime and anywhere
- › Excellent user experience
- › Flexible and scalable

### Reduced complexity & increased security

#### Centrally managed & secure

- › Latest approved software and upgrades
