

PowerApps 3PL Connector

Dynamics 365 eCommerce Delivery Connector (PowerDeliver)

Looking for Dynamics 365 eCommerce shipment connector

all-in-one delivery management technology designed to organize, control, optimize, and scale your delivery operations from the warehouse or store to the final mile and power your Dynamics 365 with readymade connector to most active logistics companies in Middle East.

Provides you with a number of APIs and tools that allow you to seamlessly integrate Dynamics 365 eCommerce with your logistics/delivery supplier.

Key trusted features that you need

- Built-in Dynamics 365 eCommerce connector
- Expand your logistics to your preferred shipping supplier with low code/no-code solution.
- Plug and play Connector
- Transform your shipment status to Dynamics 365 eCommerce
- Provide your buyer real information on shipment status.
- Select delivery supplier based on your method of shipment or other criteria.

Dynamics Shipping Connector

PowerDeliver APIs enable you to integrate real-time ecommerce order tracking information into your mobile app or website, an email, or a text message. Each time the package status changes (for example, from accepted to in-transit to delivered), the API will ensure this update is transferred to your Dynamics 365 eCommerce.

Scale Your Business

Manage your shipping integration flexible with the PowerDeliver Multi-Carrier API. PowerDeliver's API library includes all the carriers' products and services.

Fully Tested

You can go live in a few hours since the ARAMEX integration is fully working and tested with thousands of shipments.

You can use our multi-carrier API to empower your existing shipping process

Expand your Dynamics 365 eCommerce fulfillment to link your eStore to any multi-carriers.

Use Paperless technology

For the supported carrier, you can use paperless for all your international shipments and save time and paper.

Unique Shipment Experience

PowerDeliver APIs are easy to integrate, always updated and fully tested with thousands of ARAMEX shipments.

Successful Deployment

Part of being a successful Dynamics 365 eCommerce retailer is making sure your customers always have the most up-to-date information. This could be the date a new product line is launching, when the day they can expect their delivery, with our PowerDeliver you can get more.

PowerDeliver

We developed our API with the leading Dynamics 365 eCommerce technology solutions to help grow your business smarter, faster and stronger than ever before.

- Deliver a refreshingly seamless return process that exceeds expectations to ensure customers become loyal and repeat shoppers.
- Centralizes all your sales channels, PowerDeliver, and other stock locations in one management solution.
- Offer a fully branded online flow with intelligent one-click suggestions, multiple return options.

Tangible Benefits / Desired Outcomes

- APIs for shipping and logistics are becoming the most popular tech practice among businesses of all sizes focused on integrating shipping functionality into web or mobile solutions. In recent research conducted with 200 supply chain managers, 55% of the respondents believe APIs is a practical option to function in real time.
