

Teams App and Solutions Envisioning Workshop

EXTEND TEAMS TO ENHANCE COLLABORATION

More than just a collaboration product, Microsoft Teams can be leveraged as a platform to surface low-code automation experiences and custom line-of-business apps. Habanero helps envision, design and build custom solutions in Microsoft Teams by leveraging Teams capabilities including tabs, messaging extensions, task modules, interactive cards and conversational bots

The **Teams App and Solutions Envisioning Workshop** is a 2-day engagement designed to quickly educate stakeholders around the art-of-the-possible, brainstorm opportunities, prioritize focus and design a high-level solution and implementation plan.

Educate

Align key stakeholders around the benefits and possible ways you can create new capabilities in Microsoft Teams.

Brainstorm

Brainstorm and prioritize use cases or scenarios that could improve employee experiences and drive business value.

Plan

Define the best solution concept leveraging available App templates, low code solutions or custom methods.

ENVISIONING WORKSHOP (2+ DAYS)

Pre-engagement activities

- Plan for the workshop activities
- Identify sponsor and key business stakeholder
- Confirm availability and target schedule
- Conduct business orientation and introduce key stakeholders
- Provide background details to create a shared context

Art of the possible

- Through a series of examples, demonstration or videos, we highlight the many ways in which you can leverage apps and extend the core capabilities in Microsoft Teams
- Digital workplace specialist will lead a prioritization and detailed scoping exercise
- Two 2-3hr virtual workshops

Design and planning

- Based on the high-priority scenario identified, we will explore the most ideal solution concept
- Any integration, deployment, configuration or custom development considerations will be identified
- Implementation plan will be documented and delivered

Rapid deployment options to build on your Microsoft investment

Pre-built apps for Microsoft Teams

Leverage Microsoft or 3rd Party Apps to instantly snap into your Teams environment.

Low code frameworks

Layer in custom capabilities and design patterns to save time and streamline the experience for end users.

Custom extensibility options

Build on Microsoft's app patterns to extend capabilities and create new solutions that fit directly into the Teams UX.

Wide variety of enterprise options

Whether you deploy an existing solution or build from scratch, Teams is ready for your complex collaboration challenges!

Create exceptional employee experiences

Modernizing collaboration experiences is difficult when you are stuck with legacy technology. Instead, create a digital nucleus of apps and interactions in Microsoft Teams that simplifies unnecessary task switching and inefficiencies in day-to-day work. When you think of Teams as a platform, the possibilities are endless. Automate simple tasks. Streamline experiences with enterprise systems like ServiceNow. Transform employee experience with Microsoft Viva or build your own custom EX capability to make life better for your employees.
