- Applications destined for Azure qualifies/quantified
- HPE Migration factory framework used to agree migration plan

Azure migration accelerated

- Stakeholder agreement on transition plan
- Budget's agreed / secured
- Migration plan ready with migration waves
- Clear plan of migration treatments

In a highly competitive retail market, the Co-op recognises the need to stay modern and relevant by embracing new technology and responding quickly to the changing needs of customers. It has embarked on an IT transformation programme which will replace on-premise data centres and remediate technical debt with a cloud strategy that will accelerate innovation, improve agility and optimise the total cost of ownership. As part of this transformation, the Co-op worked with HPE as a strategic technology partner. HPE's extensive hybrid and public cloud experience and know-how, coupled with its strong Microsoft relationship, has helped the Co-op build and validate the Microsoft Azure production environment, accelerate the migration of the first wave of applications to Cloud, and helped shape the new Cloud Operating Model.

Alex McBain
Cloud Migration Programme - Delivery Lead

Executing on your hybrid cloud strategy

Rapid Readiness Assessment and the Cloud Adoption Framework identifies planning steps and timeline to accelerate cloud transformation journey. Duration: 10 Day Service

Every client's journey to cloud is different. The 10 day engagement identifies your next-steps and provide best practices. Deliverables, based on customer's scope, include: documented shared understanding, vision, goals and objectives of cloud transformation road map; potential deep dives into DevOps, Security, Big Data, or IoT to uncover cloud transformation blockers; and documented summary of assessment recommendations and timeframe around your cloud transformation program.
