Windows Virtual Desktop

Get started with a 2-week Proof of Concept (PoC)

Through Windows Virtual Desktop (WVD), Move offers a comprehensive virtualization service through the Windows Azure cloud service. A 2-week PoC will give the customer a good insight in how Windows Virtual Desktop will work in their business, and have a solid base for deciding further implementation

Windows Virtual Desktop in Azure opens a host of possibilities:

- Multi session Windows 10 deployment delivered as a full, saleable Windows 10 deployment.
- Office 365 ProPlus is virtualized and optimized for multiuser environments.
- Windows 7 virtual desktops with free, Extended Security Updates are available
- Virtualize desktops and/or applications

Mapping/requirements week

Preliminary workshop with the following goal:

- Map out the customer's needs and make a requirements specification
- Define applications suited to run in Azure WVD
- Define a pilot user group
- Educate and inform the customer using a WVD lab demo

Pilot week

Deploy and start a pilot

- The Move consultant that is responsible for the customer presents the pilot to the customer
- The pilot users test the solution against the requirement specification.
- Testing is done in close cooperation with a team of Move consultants

Post workshop presentation that contains:

- A requirements specification of what must be part of the PoC
- A draft of the architecture, complete with a design and cost estimate of the solution
- The solution will then be deployed in Azure as soon as the customer accepts the parameters

Post pilot week, the customer gets a report containing:

- The Azure architecture
- Results and evaluation of the pilot week and testing
- Cost estimate of a full implementation
- A recommendation of «where to go» after the PoC

A WVD Proof of Concept is suitable for organizations that haven't already virtualized their desktops, and organizations that need to upgrade their existing virtual desktop solutions.

Move has more than 30 years of experience in digitalization and transformation projects. We are in close cooperation with all the leading technology vendors. We are brand agnostic and pride ourselves on giving our customers the best advice based on their needs and the technology available.
