

Senseye PdM Enterprise

Powering your PdM journey

The leading Predictive
Maintenance platform, driven by
your in-house expertise, to power
your digital transformation

Benefits of Senseye PdM Enterprise

With our platform-based approach, deploying Senseye PdM Enterprise provides you with everything you need to rapidly empower your teams to assess, deploy, operate, and scale your predictive maintenance journey.

- You are in complete control
- Full integration, extendibility and customization
- Leverage your maintenance teams expert knowledge and experiences
- Use your digital teams to develop capability unique to your business
- Knowledge transfer to empower your own teams

"Successful Predictive Maintenance requires multiple disciplines working together to enact change. Senseye has for some time been a leader in the Machine Health Management area and the launch of Senseye PdM Enterprise helps to ensure that Digital Acceleration teams can have the best tools they need to drive maintenance optimization"

David Metcalfe, CEO, Verdantix

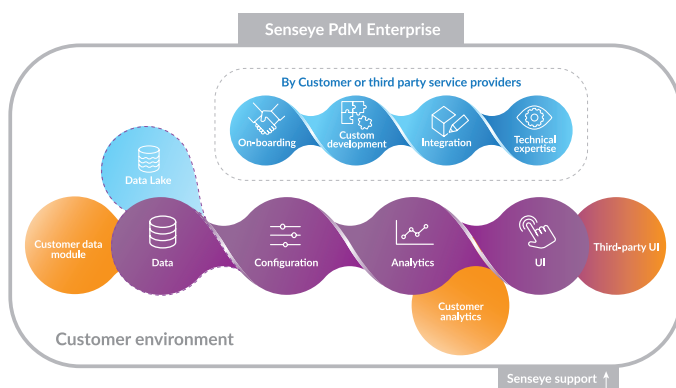

Senseye PdM Enterprise

Senseye PdM Enterprise puts you in full control of your Predictive Maintenance journey, giving you a flexible and open approach for your organization to fully own your predictive maintenance story with the best tools in the world, combined with the best knowledge in the world of your assets and practices - yours.

Senseye's unique technology and IP is fully available to you, augmented with your in-house skills and expertise enabling your maintenance and data science teams to halve unplanned downtime and increase maintenance efficiencies, saving money and time whilst achieving a typical ROI of less than 3 months.

Senseye PdM Enterprise is more than a platform with an open architecture. It has unparalleled integration capabilities, administrative tools, and the ability to leverage your own in-house skills and IP.

Senseye's predictive maintenance solutions are designed to be highly intuitive and provide maximum value by leveraging your existing infrastructure investments. Our machine health monitoring solutions have already been successfully deployed and scaled by dozens of Fortune 500 companies to reduce maintenance spend whilst boosting reliability and productivity.

Supporting your industrial teams

Your teams have the expertise and skills to take initial deployments and make them global, while ensuring they fit into your wider organizational vision whilst retraining full ownership. Senseye PdM Enterprise has all the leading out-of-the-box capabilities that you've come to expect from Senseye PdM, with you in the driving seat to do so much more:

Empower your Teams - own the journey

Senseye PdM Enterprise gives you control over your Industry 4.0 predictive maintenance journey. You can make use of and leverage Senseye's unique intellectual property, deciding how it's deployed, used and extended. You decide and own your data strategy.

Leverage your expertise

No one knows their machines as well as your maintenance professionals who look after them day after day. Senseye PdM Enterprise provides the tools and capability to allow your industrial teams to capture their expert knowledge to extend and enhance our Predictive Maintenance platform with your unique experience. Changes and additions you make are owned by you.

Open and extendable platform

Senseye PdM Enterprise is an open and extendable platform that can be easily integrated with your digital architecture. You can extend, integrate and customize to satisfy your specific needs while leveraging your own digital teams and your valuable Intellectual Property.

Supporting your entire journey

The road to Predictive Maintenance success takes courage to make significant changes - you're not alone. Using Senseye PdM Enterprise together with our deep domain experience and knowledge, you take complete control of your predictive maintenance journey.
