WEBSITE / APP MIGRATION TO AZURE

READY TO HARNESS THE POWER OF THE CLOUD AND SAVE SOME MONEY AT THE SAME TIME?

BUI will perform a Readiness Assessment analyze your IIS / Linux installation and identify which sites can be migrated to the cloud, highlighting any elements which cannot be migrated or are unsupported on the platform.

Once analyzed we will also create the website(s) and database(s), under a given Azure subscription, required to support your site(s). We will report back on any issues it we see that might be interrupt or effect the migration and provide assistance and guidance around possible issues.

The BUI offering, combined with the power of Microsoft Azure App Service will give your Website or Application the following benefits and more:

* Jumpstart your app building
* Increase developer productivity
* Ship updates faster
* Achieve global scale on demand
* Get actionable insights and analytics

This offering includes the following deliverables:

1 **Scoping Workshop**
BUI will perform a Readiness Assessment analyze your IIS / Linux installation

2 **Analysis and Testing of Website / Application health**

3 **Incompatibility Report**
Detail which Website or App workloads cannot be migrated

4 **Azure Configuration**
Create the website(s) and database(s), under a given Azure subscription

5 **Migration Status Report**

Costs

Starting from R40k

Cost subject to Scope Assessment

Excludes any Azure Hosting

Solutions available on the Azure Marketplace
