# Consultancy Packages

Questions you may have...

## You're new to Azure

How can Azure be used in my business?

Where is the best place to start?

How do I define objectives and create a plan?

What are my options across my IT estate?

## You've started but you want to do more

How can I safely scale my Azure usage?

What do I need to make sure we are ready to scale?

What does an optimisation road map look like?

How can I create a business case for further Azure spend?

## You've deployed

How do we make sure we are fully secure and optimized?

Are we really getting the optimum value from our deployment?

What measures can we put in place to ensure CI/CD?

# Consultancy Packages

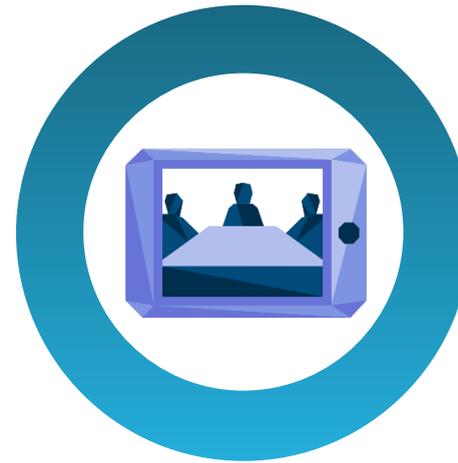

How do they help?

Prevent unnecessary  
expenditure

Faster project  
delivery

Bring together  
key stakeholders

Ensure resilience  
in future plans

# Consultancy Packages

## Your Options

**Azure 101** - Helping the IT and business leaders in your organisation gain a better understanding of Microsoft Azure.

**Data Centre Modernisation** - Ideal for businesses that want to understand if Azure is right for them or want to build a business case for moving to Azure.

**Azure Enterprise Scaffold set-up** - You may have heard Microsoft talk about Azure Scaffold. This is a package for anyone that has reached a blocker preventing them from using Azure at scale and need to implement Azure Enterprise Scaffold to increase scale safely and efficiently.

# Consultancy Packages

## Your Options

**Azure technical design review** - For organisations that are already using Azure at scale or will be imminently and want to have their technical design critiqued by an Azure Expert.

**Azure security design review** - For organisations that are already using Azure at scale or will be imminently and want to have the safest environment possible that has been tested and verified by an external Azure expert.

# Azure migration

## 1. Qualification

We'll understand your needs, compliance requirements and strategy, and develop a plan that fits your current and future objectives.

## 2. Discovery Workshop

Our consultants will use information about your current IT environment to build a comprehensive cost analysis, business case and migration strategy.

## 3. Planning
