

Enterprise Mobility + Security

Empower your mobile workforce with the tools to communicate and collaborate securely

Overview

NEC's EMS is a flexible, modular service offering that enables your organisation's workforce to remain productive and work flexibly anywhere, anytime and across any device with a consistent user experience whilst ensuring that your organisation's data is secure and protected at all times and that you remain one step ahead of security threats.

Users can continue to remain productive at all times by accessing the information they need and when they need it whilst the necessary identity, authorisation and secure connectivity measures are in place to protect and secure their files and emails accessed across multiple devices both inside and outside of their organisation.

NEC will help you navigate through your organisation's mobility needs and help you understand how to adopt the right governance and policies which allow your employees to work remotely whilst remaining safe, compliant and protected. With a quick and free EMS assessment, NEC will help you evaluate your mobility landscape and provide consulting advice to help you determine how well your strategy addresses the foundational principles of enterprise mobility and where NEC can step in to help.

Benefits

Flexible service offering

Choose from a basic level of support in our Essentials offer all the way to 24x7 support in our Premium offer.

Industry leading technology

NEC is a Microsoft Gold Partner in Communications, Windows & Devices.

Secure your mobile workforce

NEC are able to implement a solution suitable to your organisation with the right governance and policies.

Managed by experts

Leverage NEC's expertise and access Microsoft certified engineers without having to employ expensive staff directly or invest in significant training.

Service Modules

BUSINESS CONTINUITY & RECOVERY PLANNING

Quickly and easily adopt the right tools, templates, governance and policies, allowing your employees to work remotely whilst remaining safe, compliant and protected.

IDENTITY & ACCESS MANAGEMENT

Ensure the right people have the right access to the right resources. Protect, monitor and audit access to critical assets while helping maximise employee productivity.

INFORMATION PROTECTION

Stay more secure by adopting a Zero Trust approach. Provide more protection to people working anywhere, on any device, with any app using our identity-driven security.

THREAT PROTECTION

Identify, detect, and respond to threats, compromised identities, and malicious insider actions across your on-premises and cloud environments. Protection with adaptive, built-in intelligence.

ENTERPRISE MOBILITY MANAGEMENT

Enable your workforce to use any device, anywhere, anytime whilst staying protected with a single endpoint management solution. Securely manage iOS, Android, Windows and macOS devices.

WINDOWS VIRTUAL DESKTOP

Provide users with a practical, modern and consistent experience with a workspace that's highly scalable, always up-to-date and available on any device.

REMOTE USER CONNECTIVITY (VPN)

Secure information in transit and control user access to select networks inside your organisation's data centres and Cloud environments.

DOCUMENT AUTHENTICATION

Log which users have accessed documentation and detect when other individuals are looking at sensitive information on authorised devices.

Our Approach

Following a Preliminary EMS Assessment, NEC will help you evaluate your mobility landscape and provide consulting advice to help you determine how well your strategy addresses the foundational principles of enterprise mobility and where NEC can step in to help.
