

Skribble is the one-stop shop for digital signing with Swiss privacy that provides the legally suitable signature for any document

Save yourself the hassle of printing, scanning and going to the post office by using Skribble to sign your documents. Skribble will reduce your costs for signing by up to 80% while contributing to conserving natural resources. As a highly specialised TrustTech company, we offer electronic signatures that are legally binding and valid worldwide. With Skribble, you can sign any contract simply and securely online – without having to introduce new systems or connect hardware. Our e-signature platform enables you to sign from any browser, device and location. You can choose between three e-signature standards defined by law and sign any document with customers, employees, partners and suppliers in record time.

Why sign with Skribble?

Efficient from any location

With Skribble, all parties can sign in a matter of seconds. The elimination of paper and post speeds up your contracting process and reduces costs. Signing with Skribble means you never have to worry about installing software, dealing with security upgrades or additional hardware. It is easier than pen and paper and works from any device and any place.

Integrates with your systems

Choose the plan that's right for your needs. You can easily integrate Skribble with your existing IT infrastructure via our modern API or you can sign directly from your favourite tools such as Google Drive or MS OneDrive.

All documents covered

Skribble enables you to sign any document – even if the law requires a handwritten signature. Depending on the legal weight required, you can choose between a simple (SES), advanced (AES) or qualified electronic signature (QES). No matter if employment contract, internal document or agreement with external parties – we have got you covered.

Hosted in Switzerland

Skribble runs exclusively on Swiss servers and is hosted at the security level of Swiss banks in an ISO 27001 certified data centre. We encrypt all documents with AES-256 directly after upload. Nobody can read along, not even Skribble.

Legally valid worldwide

Our signatures are valid globally. For documents that require the written form by law, the qualified electronic signature (QES) is the way to go. For all others, you decide which standard best suits your internal policies and compliance rules. This way, you can sign legally binding documents with customers, employees, partners and suppliers from all around the world.

Fully compliant

We are 100% compliant with the Swiss Federal Data Protection Act (DSG) and the European General Data Protection Regulation (GDPR). Skribble is a secure solution that complies with all Swiss and EU data protection directives so that you can start signing immediately.
