

Noviqu Ensignht™

A software platform that brings together Safety, Training and Maintenance processes.

What does Ensignht do for your facility?

Track Safety Incidents

Create and track safety near-misses, incidents or potential problems using your customized templates.

Individual Training

Assign Training to your employees and watch them progress.

Create and Maintain Checklists

Create pre, during, or post work checklists for safety, maintenance and quality assurance.

Gain Valuable Insights

Create robust reports and learn just how well your facility is performing.

Track Maintenance Requests

Request preventative and repair maintenance requests.

Schedule Preventative Maintenance

Create and schedule preventative maintenance to meet your company's needs.

Engage Employees

Use challenges, points and levels to engage and reward employees on the job.

Workplace Advancement

Put workplace advancement into the hands of your employees by setting level requirements.
