MS Azure Site Recovery POC

—

Andrea Cori, Infrastructure, Business Unit Manager
10/02/2020

Customer Engagement 3 day PoC Azure Site Recovery

- If you are looking for a new workload protection model, look no further than this "as a service" Disaster Recovery solution

- The proof of concept is designed to demonstrate the benefit of a new data protection model for your infrastructure, based on Azure

- You will see how to protect a service and how to restore it in Azure

cegeka

- Your infrastructure's connection to our Azure subscription. This step is useful for connecting your service test (vm) to our recovery site on Azure

- You'll see what components make up the Azure Site Recovery solution and what its protection architecture is like

- Recovery points configuration on Azure

- We'll explain how to configure Recovery points on Azure and how to use them to restore services. This part includes the Disaster Recovery failover

- We'll demo all the steps you need to take in order to bring production back to the primary data center

Deliverables
