S/4HANA On Azure – POC – SAP Digital Transformation

PoC Milestones

Preparation phase

Prepare Azure Cloud (RG, region, networks, resources)

Create ECC Sandbox from a production ECC database dump (provided by customer)

Prepare PoC Environment (S/4HANA, WebDispatcher)

Platform Live

Start of technical operations (SAP BC) - Preparation and Conversion:

- Maintenance Planner
- Simplification Item Check
- Cross Application Preparation
- S/4HANA installation
- SUM/DMO
- Follow-on activities

Business Evaluation

The Customer and his SAP Integrator have control over the environment for a period of two extendable months.

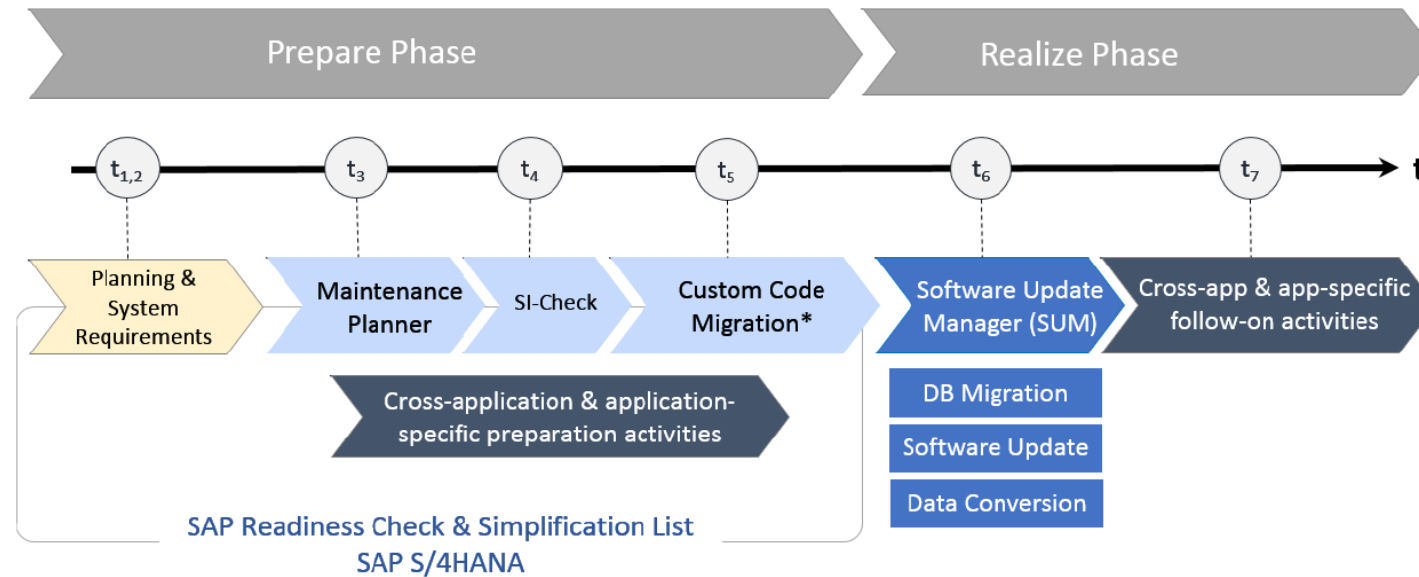

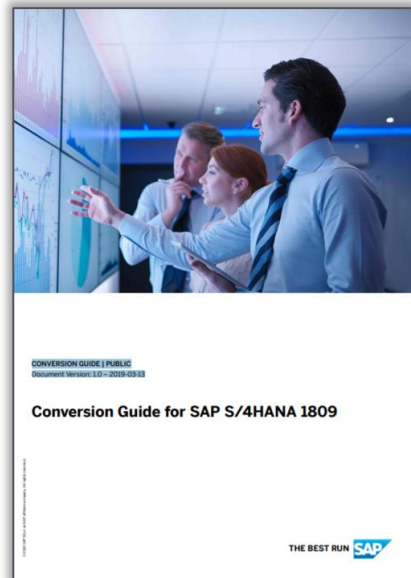

endexar GROUPEHISI helps you to define the S/4 HANA Journey with a PoC in your context

S4HANA On Azure – POC – SAP Digital Transformation Approach

SAP provides a roadmap for the Conversion S/4HANA, describes in the following document:

Conversion Guide for SAP S/4HANA 1909, version 1.0 13th March 2020

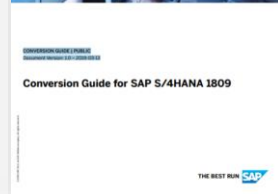

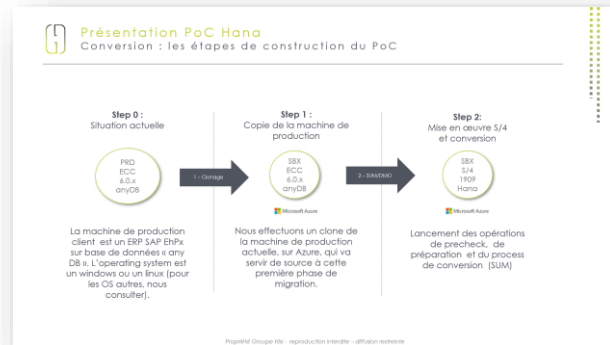

This methodology and Operations will be the north star for the Endexar GROUPEHISI Consultants during this PoC. SAPBC Technical Operations will be leaded by Endexar GROUPEHISI. The Customer and SAP Integrator will lead the Business Evaluation Phase.
