

Digital Signature for Everyone

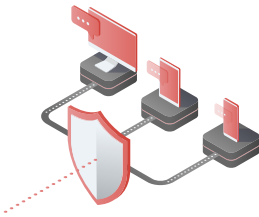

#ChooseRight, Choose PrivyID

Meet PrivyID

Indonesia's 1st and leading legally-binding digital signature service provider

Our digital signature is created using asymmetric cryptography and public key infrastructure, ensuring that each signature is linked to a unique and verified identity. Sign electronic documents anytime, anywhere, on any device.

Save, manage, and sign documents in one integrated platform

Say goodbye to the manual and outdated paper-based processes. Access, sign, and send documents with just one app.

Protect your customers' identities and electronic transactions

All PrivyID accounts have gone through government ID verification procedure and all digital signing processes require multi-factor authentication, ensuring your safety and privacy.

Reduce time and cut costs even more

Eliminate errors, and cut costs even more by getting rid of paper-heavy processes involving large volumes of manual processing, data verification, and paper storage.

Accelerate your digital transformation in compliance with the law

Our digital signature is developed in compliance with the applicable law, making them as legally binding as a handwritten signature.

Our solutions are fit for an array of industries and have been trusted by over 700 companies and 11 million users

PrivyID operates with information security management system of international standard and has been officially acknowledged by the Indonesian government
