

Your team's live workspace for design review.

Drawboard Projects is the easiest way to coordinate design reviews.

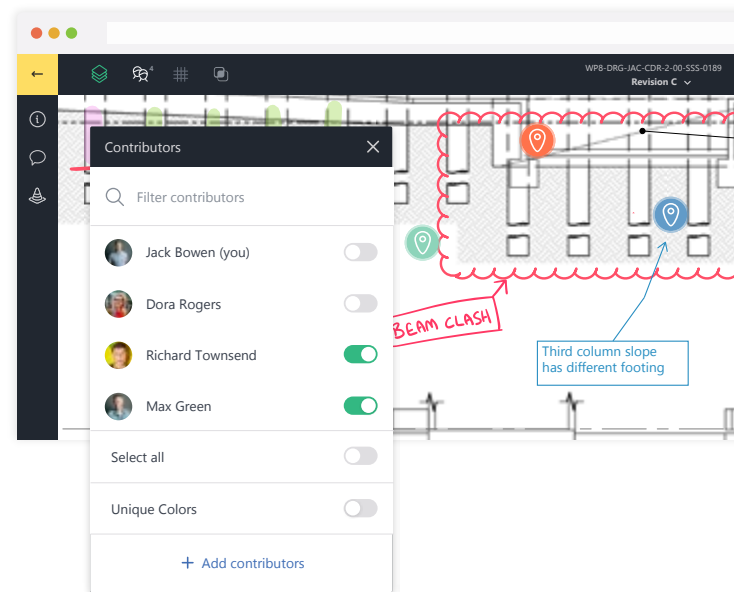

Markups Discussion Issues

Mark up drawings and documents in the same live project workspace as the rest of your team. Discuss changes and close out issues pinned to every drawing revision.

All changes are sent and received in real-time.

- Eliminate paper and over-complicated tools
- Complete design reviews faster
- Prevent rework and miscommunication

Ease of pen and paper, power of a desktop

Using Drawboard Projects, your team gets the best digital inking experience using Surface Pen and Apple Pencil, but also the power of a desktop in any modern web browser. It's about making communication easy for everyone, no matter what technology they have on hand.

Collaboration by default, not as an add-on

If your tools treat collaboration as an afterthought, so will your team. Bullclip ensures that your team are literally on the same page when they review designs. 'Always-on' collaboration is the new default.

Keep all design communication in one place

Within your team

Iterate quickly with centralized and versioned feedback.

Between offices

Coordinate across multiple offices and see markups as they are added.

Across all stakeholders

See all third-party feedback on one drawing canvas. No need to consolidate feedback.

Live markup on any device

Review in real-time in any web browser and on iPad, iPhone and Windows 10.

On-drawing discussion

Discuss markups, work in progress and notify your teammates on every drawing.

Issue management

Create assignable issues within the context of a drawing to track feedback.

More efficient quality control

Overlay drawings and revisions on top of each other to compare details and markups.

Markup layers

Toggle draft, public and contributor layers on the canvas to filter design feedback.

Easy file management

Tag all drawings and documents for easy search and scan title blocks on upload.

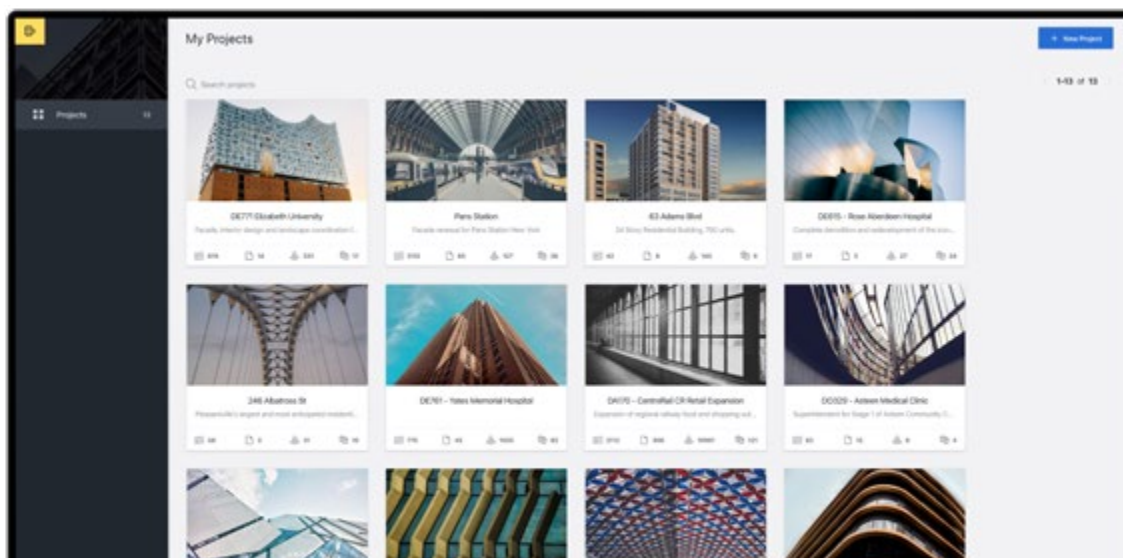

Integrate with your current systems

Work with files from BIM360 Docs, Procore, Oracle, Dropbox, Google Drive and more.

Guest access

Invite external partners to contribute feedback with temporary access.
