# Description:

Advanced Data Flow Chart is an enhanced version of GCC Data Flow Chart Excel Add-in. It adds features requested by the users, such as

- 1. User can change the colors of the data flow by source or target or define an own color for the flows.
- 2. User can set the node width, padding.
- 3. User can select to display the values in the diagram or show the label only.
- 4. User can select the font name, font size, and style for the label.

As the GCC Data Flow Chart Excel Add-in, it provides 4 types of sample data to show the format of the data. A video tutorial shows how to build the data for the diagram.

# Instruction:

1. Download this add-in and start Excel 2013 SP1 or later.

- 2. Select a sample data type in the sample data drop-down in the setting window and Click Insert Sample Data button to view the chart.
- 3. Clean the sample data and set the focus to the first cell.
- 4. Select a different sample data in the setting window and view the chart.
- 5. Repeat step 2, 3, 4 to view all the 4 different sample data.
- 6. Build own data and paste into sample data table and click binding existing data button to draw the chart.
- 7. Select settings for node width
- 8. Select settings for label font name, stype, color and size in the setting window
