Network readiness & Optimization assessment for Azure

Professional Services- Consulting

Network readiness & Optimization assessment for Azure

Objective of the offer

Help prepare the customer network for an optimized experience when connecting to Microsoft Azure services

Highlights

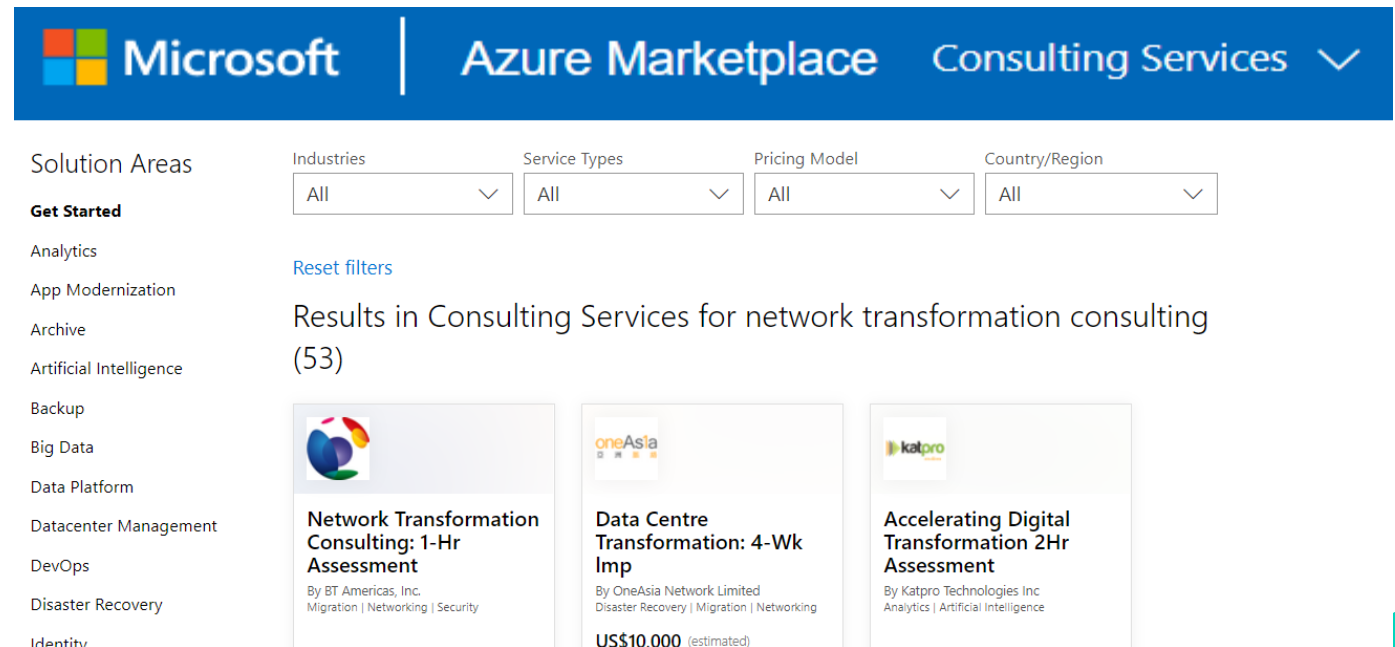

1. **Two-hour free** assessment of customer's connectivity services
2. **Available since November '19** in [Microsoft Azure Market place](#)

Delivery

Assessment is done remotely or on-site (depending on the location) including local language. Delivered by Colt Sales Engineers

Prerequisite

This assessment is for organization considering or already having Azure Cloud services or Microsoft Office-365/Skype/Teams

The screenshot displays the Microsoft Azure Marketplace interface for Consulting Services. The top navigation bar includes the Microsoft logo, 'Azure Marketplace', and 'Consulting Services' with a dropdown arrow. Below the navigation bar, there are four filter dropdown menus: 'Solution Areas' (with a list of categories on the left), 'Industries' (set to 'All'), 'Service Types' (set to 'All'), 'Pricing Model' (set to 'All'), and 'Country/Region' (set to 'All'). A 'Reset filters' link is visible. The main content area shows 'Results in Consulting Services for network transformation consulting (53)'. Three service cards are displayed:

- Network Transformation Consulting: 1-Hr Assessment** by BT Americas, Inc. (Migration | Networking | Security)
- Data Centre Transformation: 4-Wk Imp** by OneAsia Network Limited (Disaster Recovery | Migration | Networking) with a price of **US\$10,000 (estimated)**
- Accelerating Digital Transformation 2Hr Assessment** by Katpro Technologies Inc (Analytics | Artificial Intelligence)

What does the assessment include?

Networking Strategy for Azure

Walk through on different Network strategies for Azure connectivity. Understand customers' physical locations and existing network infrastructure and ensure that their business requirements are in line with the network requirements (such as redundancy, latency, scalability, security)

Application landscape

Understand customers existing applications landscape such as Office 365, SAP, CRM/ERP solutions, and their impact on the network/cloud infrastructure (e.g. by data flows). In particular look at specific latency requirements.

Network Assessment

Validation and verification of customer's network requirements including traffic routing. We make sure that all benefits, risks, and costs are all laid out and easy to understand, with clear and concise recommendation

Optimizing the solution

How can Colt help tailor customers solution to efficiently and securely connect to Microsoft Cloud environment including Microsoft ExpressRoute, Microsoft Azure Peering Services, Microsoft Office 365, by leveraging Colt's Voice & Data product portfolio
