This Motor Inspection PowerApps application helps streamlining the Inspection/Auditing process. User can easily manage the tasks/jobs involved and get the information.

This App allows users to submit the inspection report offline also and when connection is available it uploads the offline data to the online storage specified.

User interface is very easy to navigate and intuitive. Also, we included different PowerApps components also to make it easily modifiable in the future too.

Some of the key features

- Add/Edit inspection report
- Add new customers/sites/jobs/motors on the go
- Can work as both offline/online app
- Can capture inspection images
- have different customized PowerApps components like breadcrumbs, customized dropdowns, retractable components, pop-ups, multi-level gallery
