

Corporate Software Intelligent Shield

Protect your files and your data estate in Microsoft 365 with our comprehensive in-depth assessment.

Challenges

- Cloud security is not easy
 - During onboarding and especially within COVID, functionality is more important than security
 - Most default settings are secure – but not all
-
- With the hyperscale cloud, you are part of a global attack surface
 - Compromised tenants are often impossible to clean up
 - A lot of companies on the market claim to do security right

Ideal Solution

- Standardized security assessment
 - Clear checklists with actionable outcomes
 - Combined effort with you and a partner
 - Lots of learnings during and after the audit
-
- Repeatable for continuous learning
 - Based on Microsoft Best Practices
 - Optimized for Microsoft 365
 - 360° security view

Desired Outcomes

- Clear and helpful security report
 - Actionable items that you can follow
 - Integrated with the Microsoft 365 Secure Score
-
- Follow-Up audit possible
 - Leveraging public standards
 - Available in multiple languages

Corporate Software – Intelligent Shield

Building confidence in the security of your Microsoft 365 Platform!

Powerful

- An Audit for your Microsoft 365 tenant
- Powerful and yet simple
- Includes recommendations from the Microsoft Cyber Defence Operations Center

Scalable

- Start with a single service like Power BI
- Expand to your whole tenancy
- Include internal and guest users

Standardized

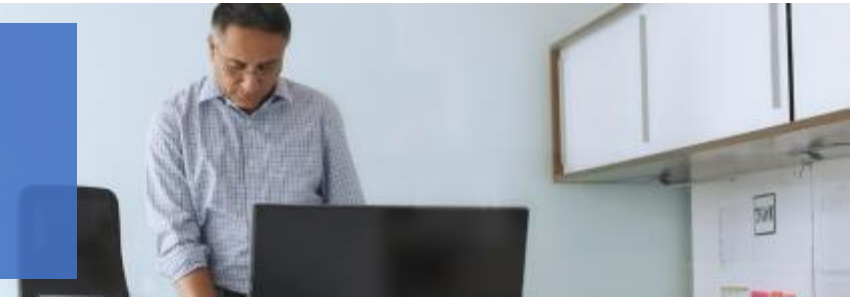

- Based on best practices
- Includes Microsofts Secure Score
- Covers all Microsoft 365 Services

360°

- All aspects in your tenant
- Internal and external users
- All license types
- Includes teams

Intelligent Shield is so valuable because it provides key insights to improve your Microsoft 365 Security

Corporate Software – Intelligent Shield

Make your digital estate secure with this comprehensive audit.

Solution Alignment

Intelligent Shield and Microsoft 365 – a perfect fit

This is not an assessment lifted from on prem and covering mostly pentesting. This was build for the cloud, from cloud experts!

Intelligent Shield and Power BI – smart combination

The assessment data lives in the cloud, and the reports are cloud native, including tools like Power BI.

Intelligent Shield and Azure – works for sure

You can even include Azure Components like Logic Apps in the review!

Customer Success Story

“For our digital learning platform, we need to be absolutely confident in our platform security. With Intelligent Shield, we can.”

-- Patrick Sommer, Lead Business Development, LeeX AG

LeeX is an innovative learning company offering an advanced and sophisticated learning platform for the digital age.

Win Results
