Application Modernization Assessment

APPLICATION MODERNIZATION ASSESSMENT

Get ready to move your legacy applications to the cloud with insights on the business impact, anticipated costs, and technology benefits of modernization.

MODERN BUSINESS IN THE CLOUD IS THE NEW NORMAL

Today's world reflects a new reality:

Technology is ever-present through the cloud, offering easy access to digital services...

Capitalizing on this shift is key to your organization's innovation and growth

...but this path forward brings new challenges

Limited business agility from aging applications

Ambiguity around **prioritizing applications for transition**

Increasing support costs for legacy applications

Streamline your move to the cloud

With the Application Modernization Assessment we take a four-phased approach

ASSESS & DISCOVER	PLAN & DECIDE	MIGRATE	OPTIMIZE
Gather accurate data from your IT environment	**Determine what changes are top priority**	**Develop a roadmap for your organization's cloud journey**	**Gain a partner to help you measure your progress**
• Get real-time details on your application environment • Understand your application estate	• Review data to align business strategy and objectives • Identify and select prioritized applications	• Analyze the cost of migration to the cloud • Create a comprehensive modernization strategy to a production-ready PAAS solution	• Track and achieve milestones using custom migration plans • Establish a utilization baseline for assessing progress over time
